

## Chapter 3 Accounts Receivable

### Overview

Customer master records contain data that control how business transactions are recorded and processed by the system. They also include all the information about a customer that you need to conduct business transactions with them.

Customer Master records represent the subsidiary ledger that supports the balance sheet accounts for Accounts Receivable, Deposits Payable, and Unearned Income. Individual customer master records are referred to as customer accounts and represent the amount owed by the customer (in the case of accounts receivable) or the amount of deposit paid by a customer that will be returned or the amounts of monies paid in advance by a customer in anticipation of receiving some goods or services from MWR or VQ Activities.

Entries are posted to customer accounts either by entering a transaction (sometimes referred to as an “invoice”) that establishes the receivable or liability against the customer. Payments against receivables are most frequently posted on a Daily Activity Record (DAR) as are payments received in advance or deposits. Invoices are entered, for example, when a returned check is received, when an individual hosts a private function at a MWR facility, or when a Command checks out of the Visiting Quarters and must be billed all room charges.

As noted above, some customer transactions represent liabilities instead of receivables. Such as the case of Unearned Income representing advance payment of a private function or trip/tour or payment of a deposit that will be returned to the customer (frequently used in gear rental). In these situations, posted amounts should NOT be recorded to the balance sheet accounts for receivables but to the correct liability account. **Instead of creating multiple customer accounts for the same customer for multiple transactions, only one customer account is created for each customer and transactions are directed to the appropriate balance sheet account through the use of the SPECIAL General Ledger (GL) Indicator.** By entering this “special GL indicator” at the time of transaction entry, the amount paid by a customer can be easily be posted against 251001 (Unearned Income) vice 131005 (Accounts Receivable.)

As noted in the above paragraph, some customer invoices are represented by General Receivables and others represent Returned Check amounts. These two situations require posting to two different balance sheet accounts (131005 vice 132000 respectively for MWR/CIV/NFC). Again, at the time the transaction is entered, a “special GL indicator” is used to re-direct the posting for a returned check to the appropriate balance sheet account.

In both instances noted above, the customer account balance still holds each transaction (no matter which balance sheet account is affected), however the Balance Sheet reflects each transaction in the correct G/L account.

The following Special GL Indicators are available for use:

- “R” – Returned Check (will post amount to 132000)
- “U” – Earned Income (will post amount to 251001)
- “D” – Deposits Payable (will post amount to 203001)
- “V”- Fleet Voucher Program (will post amount to 131010)

Because the balance sheet accounts for receivables, deposits payable and unearned income (commonly called “reconciliation” accounts) are represented by open items posted to customers accounts, SAP is able to provide detailed reporting, aging, etc., on these accounts.

Company Code	RECONCILIATION Accounts
8042	131002- Accounts Receivable City Ledger IND Billing VQ
8042	131003- Accounts Receivable Fair Market Rental VQ
8042	132000- Accounts Receivable Returned Checks
8042	133002- Accounts Receivable City Ledger Group Billing VQ
8042	133003- Accounts Receivable Operations Contract SER VQ
5173	131005- Accounts Receivable General RECON
5173	132000- Accounts Receivable Returned Checks
5173	133005- Accounts Receivable Other RECON
1353/4047	131005- Accounts Receivable General RECON
1353	131010- Accounts Receivable Fleet Vouchers
1353/4047	132000- Accounts Receivable Returned Checks
1353	133005- Accounts Receivable Other RECON

For more information on the use of these accounts, please refer to the General Ledger Chapter for more detailed guidance.

Please use the following guidelines when entering data into the “reference or text field”:

**MWR/CIV/NFC:**

Dues/Memberships – Use membership number  
Private Functions – Use Private Party Contract number  
Marina Berthing Fees – Use Marina Rental contract number  
Child Care Fees – Use Child Name  
Vehicle Storage – Use storage contract/agreement  
NFC Leaseback – Use Aircraft Tail Number

**VQ**

Quarters Guest – Use folio number  
Command/Group – Use Command/Group Name (folio number if possible)

Customer master data is separated into 3 sections:

- **General Data**  
contains information that applies to all sales areas such as customer name, address and contact information.
- **Company Code Data**  
is specific to a company code and contains information such as reconciliation account, payment and dunning procedures.
- **Sales Area Data**  
contains information relevant to the sales organization and distribution channels of your company. It contains such information as order processing, billing and shipping.

The most common types of customers MWR has are:

Individuals and Groups

- Dues, e.g., club membership
- Fees, e.g., marina berthing fees
- Down payments (unearned income)
- Customer deposits
- Returned Checks

The most common type of customers Visiting Quarters (VQ) has are:

Individuals

- Military
- Civilians

Groups

- Ships
- Commands

**Create A Customer Master Record Centrally**

**Menu Path:** ACCOUNTING> FINACIAL ACCOUNTING> ACCOUNTS RECEIVABLE> MASTER RECORDS> MAINTAIN CENTRALLY> CREATE

Transaction Code: **XD01**

On the screen titled “Create Customer: Initial Screen”, enter information in the fields as specified in the table on the next page:

*Create Customer: Initial Screen*

Create Customer: Initial Screen

Enter the following data:

Field Name	Description	R/O/C	User Action and Values
<b>Account group</b>	<p>You must assign each account to an account group. The account group ensures that only the relevant screens and fields are displayed and ready for input for each of the customer's different partner functions.</p> <p>For example, the address, communication, and bank data fields are omitted for the account group for one-time accounts.</p>	R	<p>Enter appropriate Account Group:</p> <ul style="list-style-type: none"> <li>• Active Duty Military</li> <li>• Ship Customers</li> <li>• Civilians</li> <li>• Military Commands</li> </ul> <p>This field is NOT required if you decide to use a reference customer/company code.</p>
<b>Customer</b>		C	<p>Do <b><u>NOT</u></b> enter customer number – the system will assign a customer number when you save the master data.</p> <p><b>CIVL = 60000 – 69999</b>  <b>COMM = 10000 – 19999</b>  <b>MILT = 30000 - 39999</b>  <b>SHIPS = 20000 – 29999</b></p>
<b>Company code</b>	The company code ID	R	<p>Enter the company code.</p> <p>Company code <b><i>must</i></b> be entered to create Accounting screens.</p>
<b>Sales organization</b>	An organizational unit responsible for the sale of certain products or services. The responsibility of a sales organization may include legal liability for products and customer claims.	R	<p><b>Enter Sales Organization</b></p> <p>Sales Organization mirrors Company Code (i.e., 1034=1034; 1019=1019; 8172=8172)</p>

**Retail (MM)**

---

<b>Distribution channel</b>	The way in which products or services reach the customer. Typical examples of distribution channels are wholesale, retail, or direct sales.	R	This field will always be <b>01</b> .
-----------------------------	---	---	---------------------------------------

<b>Division</b>	A way of grouping materials, products, or services. The system uses divisions to determine the sales areas and the business areas for a material, product, or service.	R	This field will always be <b>01</b> .
<b>Reference Customer</b>	<p>The customer account that is being used as a reference as an alternative way in which to create a customer account.</p> <p>Can save time in data entry if customers share many data fields.</p>	O	<p>The system copies the master data from the reference master record. However, not all data is copied (e.g., address information is not copied over).</p> <p>This is <b>only</b> used if you want to create a customer in reference to another customer.</p> <p>All screens should be reviewed before saving any data.</p>
<b>Reference Company code</b>	The company code associated with the referenced customer	O	Select if you want to copy the default values
<b>Reference Sales org</b>	The sales org associated with the referenced customer	O	Select if you want to copy the defaults
<b>Reference Distribution channel</b>	The distribution channel associated with the referenced customer	O	Select if you want to copy the defaults
<b>Reference Division</b>	The division associated with the referenced customer	O	Select if you want to copy the defaults

Press the Enter key or the green checkmark  to continue.

You will now see a screen titled “Create Customer: General Data”. Enter information in the fields as specified in the table below. There are several tabs on this screen. You can toggle between the tabs using the Tab Control or via the menu paths **Goto > Next tab** (F8) and **Goto > Previous tab** (F7).

**NOTE:** Remember that the fields that are displayed and required will vary depending on the account group chosen.

**WARNING:** ALWAYS enter customer name, address, search term, etc., in ALL capitals using NO punctuation. Punctuation must be excluded to comply with central mail facility processing requirements.

Create Customer: General Data

Address Information:

Enter the following data:

## Address Information

Field Name	Description	R/O/C	User Action and Values
<b>Title</b>	Form of address	R	Rank or title used when creating <b>MILT</b> Customers. E1 – E9 O1- O10  <b>NOTE:</b> O10 is out of order in the drop down menu. It appears directly under O1.
<b>Name</b>	Customer name	R	Enter customers <b>last name, first name and initial</b>
<b>Search term</b>	Short name which is used to set up a match code for search criteria	R	Enter customer's last name as a search term
<b>Street</b>	Street address	R	Enter proper mailing address information.
<b>City / Regional / Postal code</b>	City / State / Postal Code	R	Enter complete address information
<b>Country</b>	Two digit country identifier	R	Enter <b>US</b> Enter appropriate country code
<b>Language</b>	English	R	Should default to "English"
<b>Telephone</b>		O	Enter customer's home phone number
<b>Fax</b>		O	Enter customer's fax number

Navigate to the *Control Data* tab.

*Control Data*

Customer **INTERNAL** JONES, JOEY MEMPHIS

Address Control data

**Tax information**

Tax code 1

Enter the following data.

**Control Data:**

Field Name	Description	R/O/C	User Action and Values
<b>Unit Identification Code</b>	Using this field for UIC number (Unit Identification Code)  Only appears for Ship or Command Customer	R	<b>Required for account groups SHIPS and COMMS:</b> Enter UIC number
<b>Tax Code 1</b>	Social Security Number  Only appears for Military, Civilian, or Employee Customers	R	<b>Required for MILT and CIVL customers:</b> Enter customer's social security number. Use format: xxx-xx-xxxx The account group will determine if this field is required.  <b>SHIPS and COMMS do NOT require this field.</b>

Click the “Company Code Data” button Company code data to view the company code information groups: Account management, Payment transactions, and Correspondence. Alternatively, the menu path **Goto → Company code data** (*Ctrl + F2*) can be used.

The screenshot shows the 'Create Customer: Company code data' window in SAP. The window has a menu bar (Customer, Edit, Goto, Extras, Environment, System, Help) and a toolbar with various icons. Below the toolbar, there are tabs for 'General data', 'Company code data' (which is selected), and 'Sales area data'. The main area is divided into sections: 'Customer' data (INTERNAL, IVANA PISAPIE, BARTLETT), 'Company code' data (1034, MWR NAS JACKSONVILLE), and three sub-sections: 'Account management', 'Payment transactions', and 'Correspondence'. The 'Accounting information' section contains fields for 'Recon. account' (with a question mark) and 'Sort key' (with a question mark). The 'Reference data' section contains a field for 'Prev. acct no.'. The status bar at the bottom shows 'DV2 (1) (200)', 'mwr sap5', 'OVR', and '09:55'.

Enter the following data.

**Company Code Data: *Account Management* tab**

Field Name	Description	R/O/C	User Action and Values
<b>Reconciliation Account</b>	<p>When you post items to a subsidiary ledger, the system automatically posts the same data to the general ledger.</p> <p>Each subsidiary ledger has one or more reconciliation accounts in the general ledger. These reconciliation accounts ensure that the balance of G/L accounts is always fully supported.</p>	R	<p>Enter the appropriate account.</p> <p>For all MWR/NFC/CIVMWR Customers use:</p> <ul style="list-style-type: none"> <li>• 131005</li> </ul> <p>For VQ customers use:</p> <ul style="list-style-type: none"> <li>• 131002 for City Ledger Individual Billing</li> <li>• 131003 for Fair Mkt Rental Billing</li> <li>• 133002 for City Ledger Group Billing</li> <li>• or 133003 for Operation Serv Contract</li> </ul>
<b>Sort Key</b>	Key for sorting according to assignment numbers	R	Enter <b>000</b>

Navigate to the *Payment Transactions* tab.

Company Code Data: *Payment Transactions Tab*

**Create Customer: Company code data**

Customer: **INTERNAL** IVANA PISAPIE BARTLETT

Company code: **1034** MWR NAS JACKSONVILLE

Account management | **Payment transactions** | Correspondence

**Payment data**

Terms of payment: **C003**

**Automatic payment transactions**

Payment methods: **C** Payment block: **D**

DV2 (1) (200) | mwrsap5 | QVR | 09:57

Enter the following data.

***Payment Transactions tab:***

Field Name	Description	R/O/C	User Action and Values
<b>Terms of Payment</b>	Terms in which the customer must pay the invoice	R	Enter <b>C003</b> Net due Immediately is always used!
<b>Payment Methods</b>	Procedure (check, bill of exchange or bank transfer abroad for example) by which payments are made.  EFT refunds will <b><u>NOT</u></b> be used!	R	Enter " <b>C</b> " for <b>Check</b>
<b>Payment Block</b>	Block key used to block an open item or an account for payment transactions.	R	Enter " <b>D</b> " for Special AR block.  This blocks an open item or an account for payment transactions.  For example, if the customer has a credit balance in his or her account, this will prevent a refund payment from being automatically prepared.

			If you need to prepare a "Check" for a credit due the customer, the payment block should be removed temporarily.

**Shipping: NO DATA NEEDS TO BE ENTERED IN THIS TAB!**

Field Name	Description	R/O/C	User Action and Values
<b>Order Combination</b>	Indicates whether you are allowed to combine orders during delivery processing.	R	Defaults "Selected". <b>DO NOT CHANGE!</b>
<b>Max. Partial Deliveries</b>	The maximum number of partial deliveries you can make (including the first delivery) to satisfy the order quantity for an item.	R	Defaults to "9". <b>DO NOT CHANGE!</b>

Navigate to the **Billing Document** tab.

*Sales and Data: Billing Document Tab*

The screenshot shows the SAP 'Create Customer: Sales area data' window. The 'Billing document' tab is active. The form contains the following data:

Field	Value
Customer	INTERNAL IVANA PISAPIE BARTLETT
Sales org.	1034 NAS Jacksonville
Distr. channel	01 MWR Distr.Ch.
Division	01 Dummy

Under the 'Billing document' section:

- Invoicing dates:
- InvoicingListDates:

Under the 'Delivery and payment terms' section:

- Incoterms:
- Terms of payment:  ?

The status bar at the bottom shows: DV2 (1) (200) | mwrsap5 | QVR | 10:00

**BILLING DOCUMENT: ONLY THE “TERMS OF PAYMENT” FIELD NEEDS TO BE POPULATED ON THIS TAB!**

Field Name	Description	R/O/C	User Action and Values
<b>Terms of Payment</b>	Terms in which the customer must pay the invoice	R	Enter C003 always!

Navigate to the Partner Functions tab.

The system will default with the customer's Name for partner functions: Sold to; Bill to; Ship to; Payer.

**You do not have to enter any data on this tab!**

Just click through it!

To save the customer master record, select **Customer → Save** or select the  Save icon.  
**The system will display a message indicating the account number that was created and the company code it was created in.**

This customer number is always a 5-digit number and follows the series:

Civilian Customers    600000-69999

Command Customers 100000-19999

Military Customers    300000-39999

Ship Customers        200000-29999

**STOP!** This completes the procedure for Creating a Customer Master Record Centrally.

## Change A Customer Master Record Centrally

**Menu Path:** ACCOUNTING> FINACIAL ACCOUNTING> ACCOUNTS RECEIVABLE> MASTER RECORDS> MAINTAIN CENTRALLY> CHANGE

Transaction Code: **XD02**

**WARNING:** Do this procedure ONLY when a change needs to be made to the customer master record.

If it is determined that the **Account Group** is incorrect, a new customer master record MUST be created. The old (incorrect) customer master record should be marked for deletion (as long as no open items are pending) and blocked for posting.

If open items exist, contact MWR HQ for assistance in transferring open items to the new (correct) customer prior to marking for deletion/blocking.

Likewise, if a customer's reconciliation account is determined to be incorrect, the incorrect customer account must be marked for deletion and blocked for posting. A new customer master record should be created!

A locally developed form can be created to use in requesting changes to customer master records or the Customer Master Request Form provided in the User Handbook can be adopted.

On the screen title “Change Customer: Initial Screen”, enter information in the fields as specified in the table on the next page.

*Change Customer: Initial Screen*

Enter the following data.

*Change Customer: Initial Screen*

Field Name	Description	R/O/C	User Action and Values
<b>Customer</b>	This the customer record that is going to be changed.	R	Enter customer number or use down arrow to search.  <b>CIVL</b> = 60000 – 69999  <b>COMM</b> = 10000 – 19999  <b>MILT</b> = 30000 - 39999 <b>SHIPS</b> = 20000 – 29999
<b>Company code</b>	The company code ID	R	<b>Enter company code</b> Company code must be entered to change Accounting screens.

<b>Sales organization</b>	An organizational unit responsible for the sale of certain products or services. The responsibility of a sales organization may include legal liability for products and customer claims.	R	<b>Enter Sales Organization</b> Sales Organization mirrors company code. .1034=1034 1353=1353
<b>Distribution channel</b>	The way in which products or services reach the customer. Typical examples of distribution channels are wholesale, retail, or direct sales.	R	<b>Enter 01</b>
<b>Division</b>	A way of grouping materials, products, or services. The system uses divisions to determine the sales areas and the business areas for a material, product, or service.	R	<b>Enter 01</b>

Press the Enter key or click the green checkmark icon  to continue.

On the screen titled “Change Customer: General Data”, change information in the fields as specified in the table below.

Remember that the fields displayed will vary depending on the account group chosen .

*General Data: Address Information*

Use the tab control to toggle between the “General Data” information groups: Address and Control data. Alternatively, the menu paths **Goto → Next tab (F8)** and **Goto → Previous tab (F7)** can be used.

*Address Information*

Field Name	Description	R/O/C	User Action and Values

<b>Terms of Payment</b>	Terms in which the customer must pay the invoice	O	<b>DO NOT CHANGE</b> Always use C003
<b>Payment Methods</b>	Procedure (check, bill of exchange or bank transfer abroad for example) by which payments are made.	O	<b>DO NOT CHANGE</b> Always use "C" for check
<b>Payment Block</b>	Block key used to block an open item or an account for payment transactions.	O	Blocks an open item or an account for payment transactions Remove this block <u>only</u> if customer needs refund payment.

Navigate to the *Correspondence* tab.

*Company Code Data: Correspondence*

The screenshot shows a software window titled "Change Customer: Company code data". The window has a menu bar (Customer, Edit, Goto, Extras, Environment, System, Help) and a toolbar. Below the toolbar are tabs for "General data", "Company code data", and "Sales area data". The "Company code data" tab is active, showing fields for "Customer" (33021, JOHNSON, MIKE, MEMPHIS) and "Company code" (1034, MWR NAS JACKSONVILLE). Below these are three sub-tabs: "Account management", "Payment transactions", and "Correspondence". The "Correspondence" sub-tab is selected, displaying a "Dunning data" section with fields for "Dunn.procedure" (2000), "Dunning block" (checkbox), "Dunn.recipient", "Leg.dunn.proc.", "Last dunned", "Dunning level", "Dunning clerk", and "Grouping key" (01). There is also a "Dunning areas.." button. Below the dunning data is a "Correspondence" section with a sub-tab "Account Statement" (2) and fields for "Act.clk.tel.no.", "Clerk's fax", and "Clerk's internet".

*Correspondence tab:*

Field Name	Description	R/O/C	User Action and Values
<b>Dunning Procedure</b>	This field contains the key for the dunning procedure to be used.	O	<b>DO NOT CHANGE unless military customer dunning procedure does NOT equal 2000!!</b>
<b>Dunning block</b>	Key which reflects the reason for a dunning block indicator	O	Leave blank
<b>Account Statement</b>	Indicator for periodic account statements	O	Change this field if you want customer to receive statement in different period (ie., weekly instead of monthly) “2” = monthly account statements This field designates how often customers will be receiving statements

The next several fields are ONLY to be completed if the customer is subject to “dunning” or automated collection processes (Military personnel are subject to dunning for returned items). We suggest that you only complete the fields as needed. For example, if the customer immediately pays his/her bad debt after being verbally notified there is no need to maintain this data. This data is used in the various levels of Dunning and is actually printed on Dunning Letters.

To access these fields (hidden from view on the main screen) Hit Extras>Texts  
Double Click on the line to be populated as follows:

Field Name	Description	R/O/C	User Action and Values
Accounting Text	Internal Use only . Will not print out on statements or letters	O	Optional Use
Account Statement Text	Enter special text that you would like to print out on the Account Statement	O	Special Text to print out on Statements such as: “HAPPY HOLIDAYS” “Did you forget to make a payment” “PAY UP PLEASE”
Commanding Officer Address (Dun Level 2)	Used to document customer’s Commanding Officer’s name and address	O	Enter CO Name and address
Paymaster Address “To” (DD139)	Used to document Paymaster Address	O	Enter the Address of Disbursing Office or PSD where garnishment (DD139) is to be submitted.

Accountable Disbursing Officer name (DD139)	Enter Accountable Disbursing Officer's Name	O	Enter Disbursing Officer's name if applicable
Certifying Officer (DD139)	Enter Certifying Officer's Name	O	Enter the Name of the MWR/VQ/CIVMWR Certifying Officer. For example this may be the MWR Director, BQ Officer, etc. <i>(The individual who must SIGN the DD139 Form)</i>

After entering data into each field (double click on the field and then type in the data) you will simply hit the “back green arrow”  to go back to the Correspondence Screen.

Click the “Sales Area Data” button  to view the sales area related information groups (if you have entered the Sales org, Distr channel and Division): Sales, Shipping, Billing document, Partner functions. Alternatively, the menu path **Goto → Sales Area data** (*Ctrl + F2*) can be used.

Use the tab control to toggle between the Sales Area Data information groups: Sales, Shipping, Billing document, Partner functions. Alternatively, the menu paths **Goto → Next tab** (*F8*) and **Goto → Previous tab** (*F7*) can be used.

**STOP!** This completes the procedure for Displaying Customer Changes Centrally.

**Block/Unblock Customer**

**Menu Path:** ACCOUNTING > FINANCIAL ACCOUNTING > ACCOUNTS RECEIVABLE > MASTER RECORDS > MAINTAIN CENTRALLY> BLOCK/UNBLOCK

Transaction Code: **XD03**

This screen is used to block/unblock a customer from further processing. Blocking Customers is a means of ensuring that no further invoices are entered against a customer with outstanding debts.

*Block/Unblock Customer: Initial Screen*

Block/unblock Customer: Initial Screen

Customer Edit Goto Extras Environment System Help

Customer 33021 JOHNSON, MIKE

Company code 1034 MWR NAS JACKSONVILLE

Enter the following data:

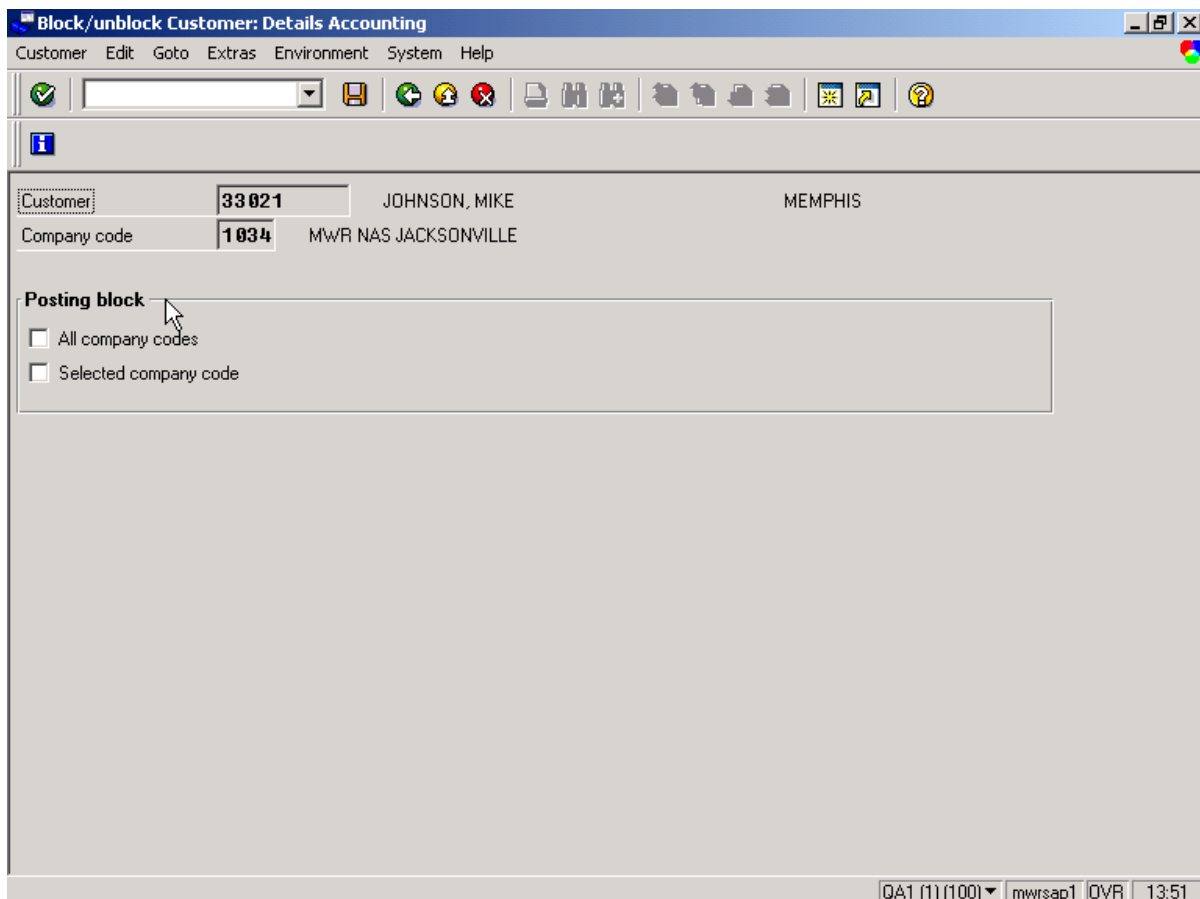

*Block/Unblock Customer: Initial Screen*

Customer:	Enter Customer Number
Company Code:	Enter appropriate company code

Press the Enter key or click the green checkmark icon  to continue

The next screen to appear is *Block/unblock Customer: Details Accounting*.

*Block/unblock Customer: Details Accounting.*

Click whether the customer is to be blocked for all Company Codes or just this specific Company Code. (Normally the customer will be blocked for all company codes, as his/her customer number is unique at the client level).

Click on the SAVE Button 

Press the Enter key or click the green checkmark icon  to continue You will get a message that the account ##### has been blocked by your User Id.

### Mark for Deletion (Customer)

**Menu Path:** ACCOUNTING > FINANCIAL ACCOUNTING > ACCOUNTS RECEIVABLE > MASTER RECORDS > MAINTAIN CENTRALLY> MARK FOR DELETION

Transaction Code: **XD06**

This is to be used to mark a customer for deletion for the archiving program.

**NOTE:** The customer cannot be marked for deletion if there are any open or parked items.

### *Flag for Deletion Customer: Initial Screen*

Flag for Deletion Customer: Initial Screen

Customer Edit Goto Extras Environment System Help

Customer 33021 JOHNSON, MIKE

Company code 1034 MWR NAS JACKSONVILLE

QA1 [1] [100] mwsap1 OVR 13:52

Enter the following data:

*Flag for Deletion Customer: Initial Screen*

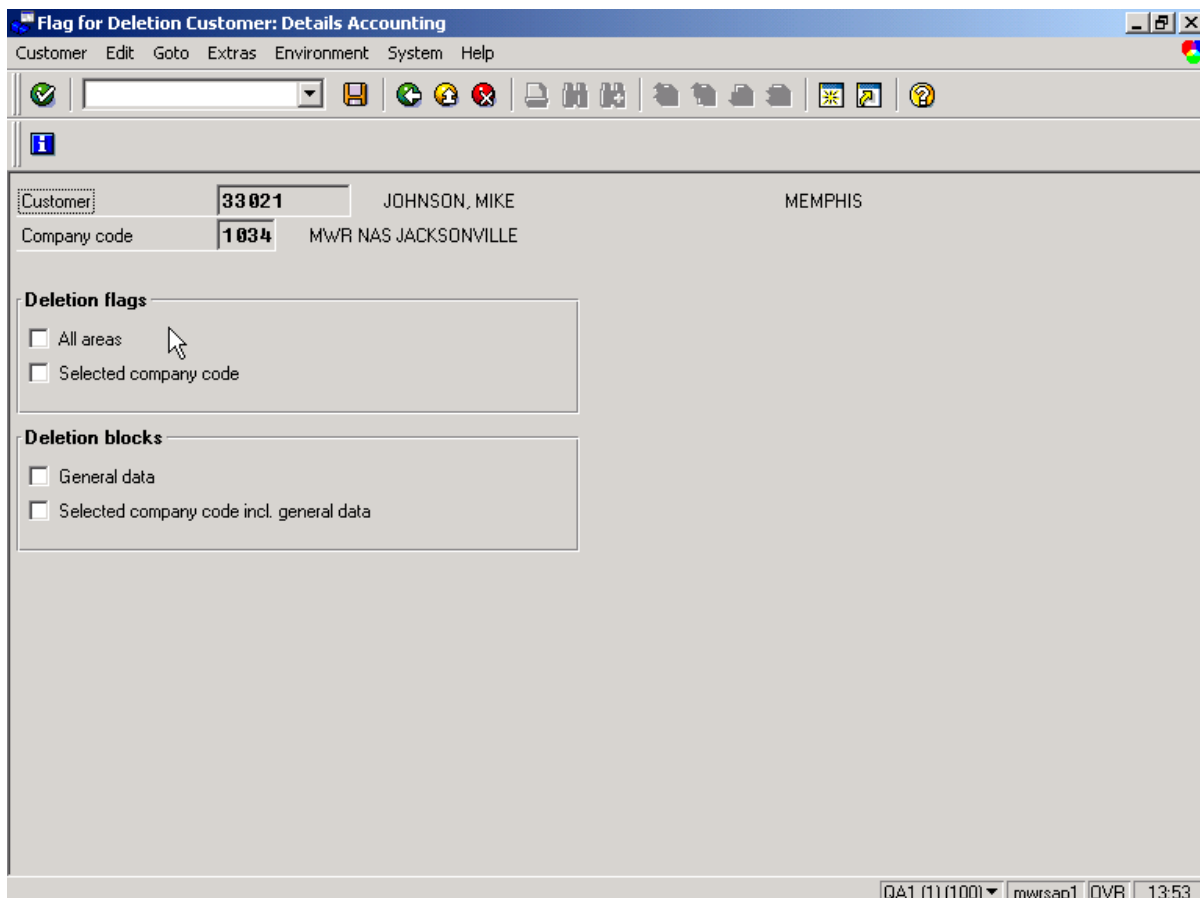

Customer:	Enter Customer Number
Company Code:	Enter appropriate company code

Press the Enter key or click the green checkmark icon  to continue

The next screen to appear is *Flag for deletion Customer: Details Accounting*.

Only use the box titled 'Deletion flags'. (The other box 'Deletion blocks' is used for more sophisticated deletion where certain customer data may be left undeleted – there should not be a use for this at MWR/VQ).

Click on all areas if the Customer is to be deleted in all areas (Company Codes), or click on the specified Company Code if it is only to be deleted in that Company Code. Normally at MWR/VQ the customer will be deleted in all company codes.

Click on the SAVE Button .

## Accounts Receivable Document Entry

14	Other payables	Credit	Customer
15	Payment receipt	Credit	
19	Special G/L credit	Credit	Customer
40	Debit entry	G/L account	
50	Credit entry	G/L account	Customer
			Customer
			Customer
			G/L account
			G/L account

### Document Types and Document Number Ranges

Document Type	Description	Number Range
DA	Customer Return Check	20
DG	Customer Credit memo	21
DP	Customer Account Maint	24
DR	Customer Invoice	23
SD	DAR Journal	13

### Invoices

MWR and VQ have the following invoice requirements (this list is not all-inclusive). Enter the following in the reference or text field when entering Account Receivable documents.

#### MWR

- Dues (club, etc) – use membership number in document header *Reference or Text* field
- Private Parties – use contract number in document header *Reference or Text* field
- Marina berthing fees – use slip number in document header *Reference or Text* field
- Document:

- ◆ Text field – Voucher #, Party Contract #, Slip#, or Rental Agreement # to a maximum of 50 characters. Note – that an asterisk \* at the beginning of the text on the text will cause it to be printed on the statement, receipt or invoice. Entry of a plus sign + will bring text in from a previous line item/screen
- ◆ Assignment field – use a term(s) that may be used for clearing the open item when payment is received. eg: sailor's name (use as needed)

**When an invoice is created through DAR (fast entry), the reference field will be used for G/L tracking ONLY, therefore any necessary tracking information should be put into the Text/Assignment field.**

**Note:** All transactions require a "Document Date" and a "Posting Date". The document date is the actual date of the document (e.g., the date the transaction occurred). The posting date will determine which accounting period the transaction will be posted to. It is critical that the document date be accurate in order for the receivable to be properly aged. SAP derives the "due date" using the "Document Date" field.

## Invoices- General Receivables

Invoices are used to post a receivable balance to a customer account such as amount owed for BQ stay, etc. Posting an invoice does not automatically produce an invoice (or account statement) to send to the customer. Account statements will be discussed later.

**Note:** A special section specifically for Returned Check Processing follows.

**Menu Path:** ACCOUNTING > FINANCIAL ACCOUNTING > ACCOUNTS RECEIVABLE > DOCUMENT ENTRY > INVOICE

Transaction Code: **F-22**

The first screen that appears is Create Customer invoice: Header Data.

**Enter Customer Invoice: Header Data**

## Returned checks

When a check is returned from the bank, the transaction is posted to the Customer with the use of **Special GL indicator R**. This results in the amount being recorded to the balance sheet account 132000. (Please note that a valid customer account must be created prior to posting any invoice or returned check item.)

**Menu Path:** ACCOUNTING > FINANCIAL ACCOUNTING > GENERAL LEDGER > DOCUMENT ENTRY > G/L ACCOUNT POSTING

Transaction Code: **F-02**

The first screen that appears is *Enter G/L Account Posting: Header Data*. The following fields, which appear on the screen, require special mention:

### Enter G/L Account Posting: Header Data screen

<b>Document Date:</b>	Date transaction occurred. Recommend this be the date the bank returned the check.

## Post an Incoming Payment from a Customer

**Menu Path:** ACCOUNTING > FINANCIAL ACCOUNTING > GENERAL LEDGER > DOCUMENT ENTRY > GL ACCOUNT POSTING

Payments for receivable amounts will be posted on a DAR. The following procedure represents the General Ledger module processing for a DAR. Partial Payments, Overpayments, Customer Deposits, and Unearned income will be posted using a DAR.

**Deposits Payable, Fleet Vouchers, Returned Check payments and Unearned income will use a Special G/L Indicator in their G/L Postings.**

The first screen appear is: *Enter G/L Account Posting: Header Data*

*Enter the following data:*

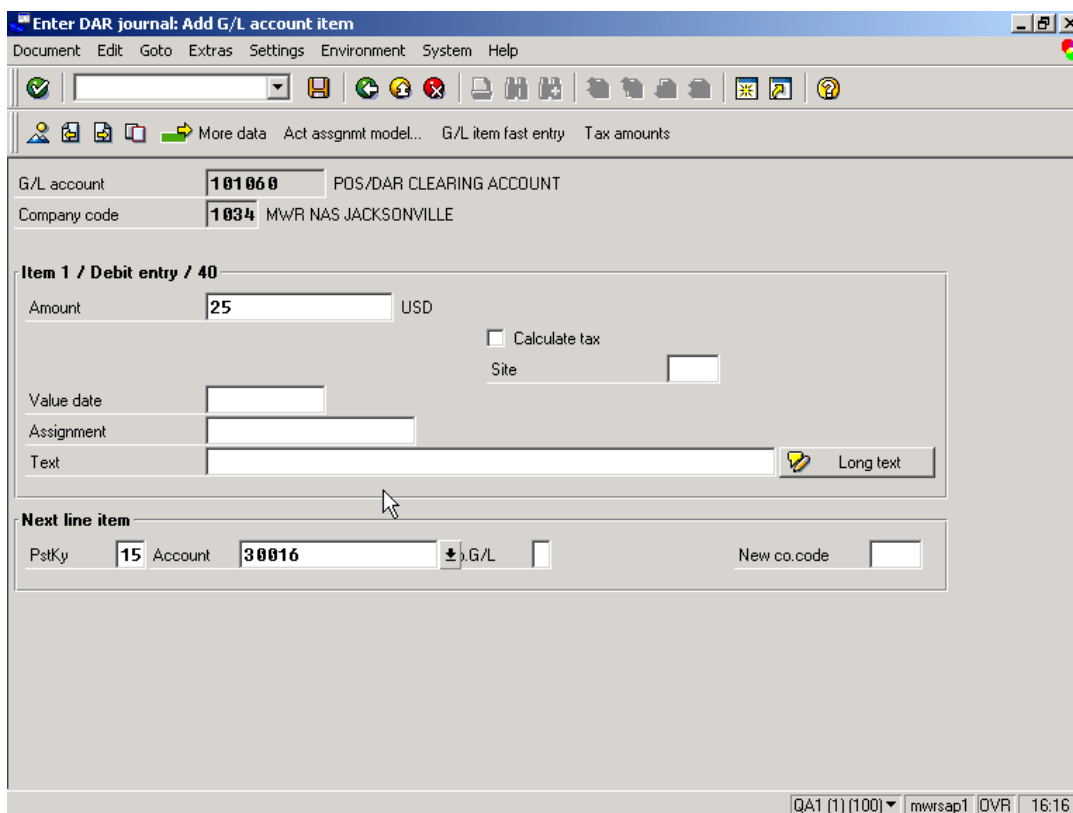

Field	Description/Usage
<b>Document date:</b>	Use appropriate date for the day's business
<b>Posting date:</b>	Use appropriate date for the days business
<b>Document type:</b>	SD

**Retail (MM)**

<b>Company code:</b>	Enter appropriate company code
<b>Reference:</b>	Your fund's unique MWR/VQ DAR reference identifier.
<b>Text:</b>	(Optional) can use for internal DAR numbering
<b>Posting key (PK):</b>	40 (debit)
<b>GL Account:</b>	Appropriate account for entry <b>Use Account 101060 DAR CLEARING or Account 110000 CREDIT CARD CLEARING</b> (cash will be recorded to 101060)

Press the Enter key or click the green checkmark icon  to continue

The next screen to appear is *Enter DAR Journal: Add G/L account item*

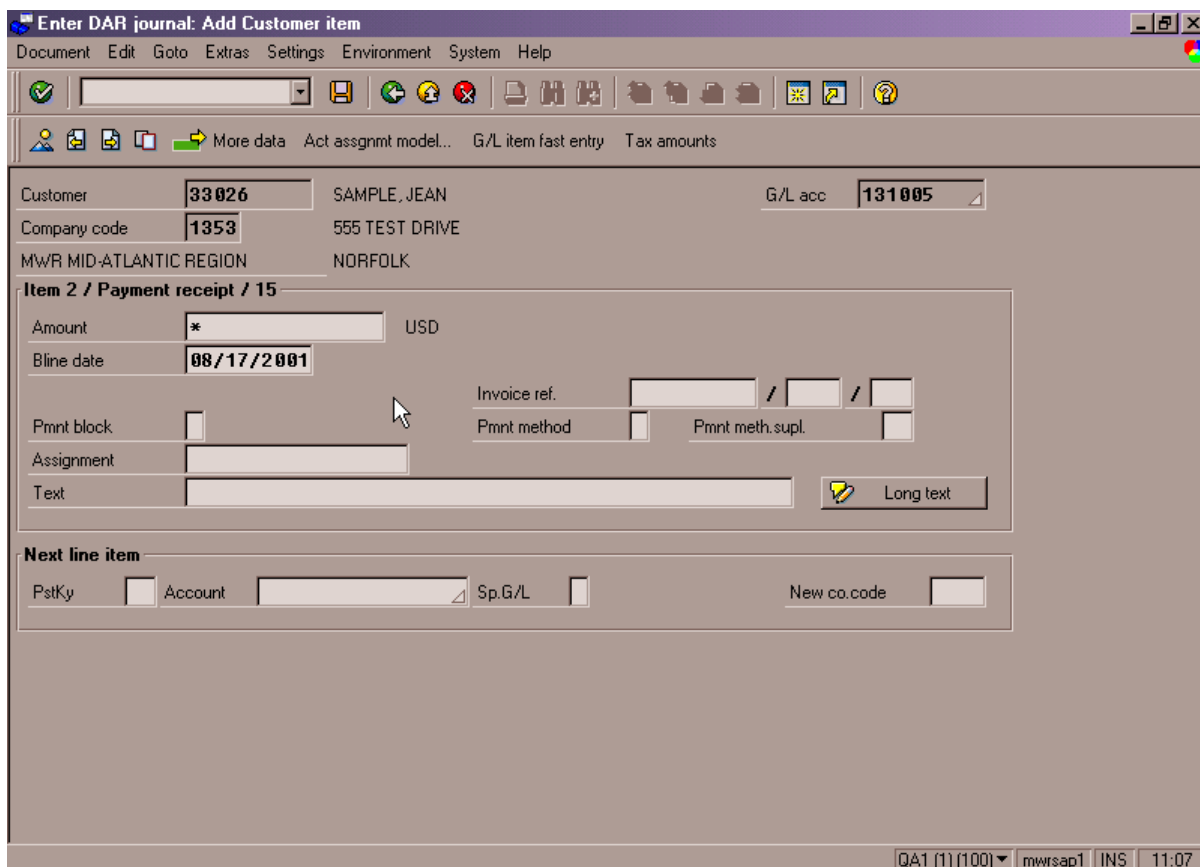

Enter the following data:

<b>Amount:</b>	Enter Amount
<b>Posting key (PK):</b>	Enter <b>15</b> (credit) for Payment Receipt OR  <b>For Unearned Income, Fleet Vouchers, Returned Checks and Deposits, Enter 19 for Special G/L Indicator</b>
<b>Assignment:</b>	<b>Enter Payee's name if it is Unearned income</b>

	<b>Leave blank if regular payment</b>
<b>Text:</b>	<b>Enter the required information according to guidelines on pg 69 and use * in front so info will print out on statement</b>
<b>GL Account:</b>	Enter Customer Number
<b>Special G/L Indicator:</b>	Enter <b>U</b> for Unearned Income Enter <b>D</b> for For Deposits Payable Enter <b>V</b> for Fleet Rec Voucher Enter <b>R</b> for Returned Check payment Leave blank if regular payment

Press the Enter key or click the green checkmark icon  to continue

The next screen appears: *Add customer item*

Enter the following data:

<b>Amount:</b>	*
<b>Due on Date:</b>	Enter date that deposit was made

Click on  to check to see if entry is in balance.

Then post the document:

Menu Path: **Document** → **Post** or Click on SAVE Button  or press F11 to post document.

## UNEARNED INCOME (Advance Payment) Using a DAR

A deposit may be required from a customer in certain situations, (i.e., a payment in advance for membership dues or an advance payment on an upcoming private function at the officers' club). This advance payment is normally applied against the final billing.

As with Customer Deposits, Unearned Income will normally be handled through a direct General Ledger posting to Account 251000. When processed this way, it is **strongly recommended** that when the document is posted, the **assignment field be completed** on the DAR using the payer's name. This will be the easiest way to match the amount of funds recorded in 251000 to a specific "customer". While a customer master record may be set up at this point of the transaction (with subsequent transactions recorded through the Accounts Receivable module), it is less time consuming to post the unearned income directly to the 251000 account. In theory, there is no receivable at this time since the individual does not owe us any money. A true receivable should be created if, in fact, the "customer" does not pay what is owed at the time of the sale of the item or service.

**The unearned income/advance payment will be handled in SAP by means of a Special G/L indicator “U” which redirects the amount of the deposit from the customer’s G/L reconciliation account (131005 or 133005), to the Unearned Income reconciliation account, 251001.**

Please refer to the procedures discussed in the Incoming payment section. The procedures are identical with the following exceptions:

1. The Special G/L indicator is “U” for Unearned Income
2. The affected GL account is 251001 vs 203001.  
(215002 for VQ)

## Deposits Payable (Customer Deposits) Using a DAR

A customer deposit may be required from a customer in certain situations, e.g., for rental of equipment at an activity. This deposit will be refunded to the customer after equipment has been returned. Another type of “Deposits Payable” or customer deposit may be unit funds held by us for a ship or Command. In this case, the monies are held until the Unit requires them for payments of goods or services.

Either type of deposit can be recorded against a customer account allowing SAP to provide subsidiary ledger support. Unit funds or other monies held for organizations MUST be maintained against a customer account.

If you wish to create a customer account at the time a deposit is received, a master record must be created (see the beginning of this chapter for instructions).

The customer deposit will be handled in SAP by means of a Special G/L indicator “D” which redirects the amount of the deposit from the customer’s G/L reconciliation account to the Deposits Payable reconciliation account, 203001.

Example: A Customer Deposit can also be handled through a direct General Ledger posting to Account 203000 (not for Unit or other organization funds.) When processed this way, it is **strongly recommended** that when the document is posted, the **assignment** field be completed on the DAR using the **payer's name**. This will be the easiest way to identify the amount of funds recorded in 203000 to a specific "customer". While a customer master record may be set up at this point of the transaction (with subsequent transactions recorded through the Accounts Receivable module), it is less time consuming to post the deposit directly to the 203000 account. In the case of deposits taken for gear rental that will be returned the following day, this may be the most efficient method of recordings. However, please note NO aging or other subsidiary ledger reporting is available using this "direct posting" method.

Refer to the procedures mentioned in Incoming Payment section. Pay particular attention to the **G/L Indicator Section**.

### **Unit Allocations - Deposits Payable**

Another type of "Deposits Payable" or customer deposit may be unit funds held by us for a ship or Command. In this case, the monies are held until the Unit requires them for payment of goods or services.

Unit funds or other monies held for organizations **MUST** be maintained against a customer account.

The customer deposit will be handled in SAP by means of a Special G/L indicator "D" which redirects the amount of the deposit from the customer's G/L reconciliation account to the Deposits Payable reconciliation account, 203001.

**PLEASE REFER TO THE UNIT ALLOCATIONS SECTION (PAGE III-153) OF THIS CHAPTER FOR FURTHER DETAILS ABOUT UNIT ALLOCATIONS PROCEDURES.**

**Stop:** This concludes the procedure for entering Customer Payments

## **Refund of Deposit Amount to a Customer and Refund Payments**

Refunds will be processed by Accounts Payable. Refunds will use the procedure explained in the Accounts Payable chapter. Please refer all refunds to those responsible for accounts payable.

**Before Accounts Payable can issue refunds to customers, *Accounts Receivable must request a REQUEST FOR PAYMENT FORM and give to Accounts Payable to process a refund.* Refer to the following process to unblock an invoice for payment. Accounts Payable will unblock the Customer during the Payment Run.**

### **UNBLOCK INVOICE FOR PAYMENT**

To unblock an invoice for payment, go to view customer's "Display/change line items"

**Menu Path: ACCOUNTING> FINANCIAL ACCOUNTING> ACCOUNTS RECEIVABLE> ACCOUNT> DISPLAY/CHANGE LINE ITEMS**

Enter customer's account number and company code.

Ensure line item selections open, cleared and special G/L transactions are selected.

Press the Enter key or click the green checkmark icon  to continue

## USA Report and Postings

It may be necessary to review the status of USA Items that have been procured through the Procurement module and have been received (using Goods Receipt). The following report may be used for information only, as per USA Procedures (as directed by MWR HQ), the USA offset entry and establishment of the receivable ***cannot be made until the time of invoice verification*** (or time of inputting of the invoice!!) You may find this report useful in an effort to monitor and manage USA purchases or to correct errors prior to invoice/vendor payment.

**Menu Path: ACCOUNTING > FINANCIAL ACCOUNTING > GENERAL LEDGER  
> PERIODIC PROCESSING > INFORMATION SYSTEM > REPORT SELECTION**

**Transaction Code: F.97**

**SELECT: MONTH END REPORT>GOODS RECEIPT USA OFFSET REPORT**

III - 87

## Retail (MM)

---

more specifically, you can enter a USA Offset Account (the offset account that would be used for setting up the receivable entry) specific posting date, cost center, general ledger account originally entered at time of Purchase Order creation.

After selecting the appropriate criteria, hit “execute”

It is important to note that on the Purchase Order, the Facility Manager or Procurement staff should enter the appropriate general ledger expense account for the initial expenditure. Do NOT enter the USA Offsets account on the Purchase Order (if you do you will receive an

error!). The report shown above will “PROPOSE” the offset account that should be used if the receivable was set up.

As you can see from the above example, an error was made by the individual creating the Purchase Order (they used the USA Offset General Account number). As a result, the system CANNOT propose the USA Offset account because the error was made. This error should be resolved as soon as possible. To resolve the error, the goods receipt should be reversed (see Section 2: Goods Receipt – Transaction Code MB01 Movement Type 102). The Purchase Order should be corrected (entering a GOOD general ledger account number), then the goods receipt should be redone as well!

### **USA Report– PO's that have had Invoice Verification**

At the end of each month, it is necessary to run a report to determine what items need to be included in the USA Offset Entry (establishing the receivable and crediting the offset account). The following report may be used to create the end of month USA entry for those items included on Purchase Orders. You may also find this report useful in an effort to monitor and manage USA purchases or to correct errors prior to posting the USA entry.

**(NOTE: Remember this is only 1 part of the USA entry – you may also have additional entries for “USA” that have been entered through Direct Invoice. Take care to include BOTH types of invoiced items on the DD2277).**

**Further processing options**

☒ No further processing

☐ Interactive list

On the selection screen, simply enter the Company Code (MWR ONLY), and enter “S” in the Account Assignment Category field. ALWAYS remember to enter the date range of the month you are working in. For example, if you are reviewing July 2001 USA purchases, enter the Posting Date (article doc) range of 07/01/01 to 07/31/01. If you want to search more specifically, you can enter a USA Offset Account (the offset account that would be used for setting up the receivable entry) specific posting date, cost center, general ledger account originally entered at time of Purchase Order creation.

After selecting the appropriate criteria, hit “execute”

Total for cost center 1932											599.00
Total for fiscal year 2001											13,594.00
Total for company code 1353											13,594.00

As you can see from the above example, an error was made by the individual creating the Purchase Order (they used the USA Offset General Account number). As a result, the system CANNOT propose the USA Offset account because the error was made. This error should be resolved as soon as possible. To resolve the error, the goods receipt should be reversed (see Section 2 Goods Receipt – Transaction Code MB01 Movement Type 102). The Purchase Order should be corrected (entering a GOOD general ledger account number), then the goods receipt should be redone as well!

**NOTE: AGAIN, remember, this report will ONLY propose you the entries for USA Offset for those items that were entered on a Purchase Order. If an item was procured on the NAF Credit Card, or through Petty Cash or other Direct Invoice payment method, this report will NOT include that information. You must either enter the offset entries at time of Direct Invoice, or you can prepare a GJV after reviewing all the items that you want to “USA” that were paid through the Direct Invoice process. PLEASE REFER TO THE ACCOUNTS PAYABLE CHAPTER OF YOUR USER HANDBOOK FOR FURTHER GUIDANCE ON DIRECT INVOICE PROCESSES**

Entering the Receivable.

**Invoice Menu Path: ACCOUNTING > FINANCIAL ACCOUNTING > ACCOUNTS RECEIVABLE > DOCUMENT ENTRY > INVOICE**

Transaction Code: **F-22**

Instead of debiting and crediting the 136000 account directly, we will now be debiting and crediting the USA customer account (note that the actual customer used for USA reimbursement differs by Region). This customer has been specially created and is the only customer whose reconciliation account is set to 136000. The customer for each region is easily identified because it has word “(USA)” at the end of its name. This was done in case the same organization that reimburses your USA is also a regular customer. The customer that is marked “(USA)” should only be used for USA reimbursement.

The new entry would look similar to the following example on the next page:

**Document Overview**

## Deleting Parked documents

If a receivable invoice or credit memo has been parked and subsequently determined to be deleted vice posted follow this transaction.

**Menu Path:** ACCOUNTING > FINANCIAL ACCOUNTING > ACCOUNTS RECEIVABLE > DOCUMENT → PARKED DOCUMENTS → POST / DELETE

Transaction Code: **FBVO**

**NOTE:** Only parked documents can be deleted.

### Post Parked Documents: Initial Screen:

Enter the following data:

<b>Company Code:</b>	Appropriate company code
<b>Document Number:</b>	Parked Document Number
<b>Fiscal year:</b>	Appropriate Year

Press Enter or click on the  green check mark icon.

Menu path:    **DOCUMENT → DELETE DOCUMENT**

A warning message will appear. Click on the Yes Button.

Message appears at the bottom of the screen.

*“Parked document nnnnnnnnnnn XXXX YYYY deleted”* nnnnnnnnnnn = document number

XXXX = company code    YYYY = year

## Reversing Documents

This transaction is used when an error is found to have been made in posting a document. For example, the incorrect customer account has been selected or the incorrect posting date was entered.

**Menu Path:** ACCOUNTING > FINANCIAL ACCOUNTING > ACCOUNTS RECEIVABLE > DOCUMENT > REVERSE > INDIVIDUAL REVERSAL

Transaction Code: **FB08**

**NOTE:** Only open posted documents can be reversed.

Reverse Document: Header Data

## Account Statements

Customer invoices are documents that detail individual amounts owed by the customer. For example, the customer fails to pay his/her child care fees and should receive an invoice. The day after a private party at the MWR Club, the customer should receive an invoice for any amount not yet paid. This being said, invoices should be run/prepared daily or weekly at a minimum.

Account Statements are weekly or monthly statements that may be printed for mailing to customers with outstanding receivable balances. This method should be used for printing account statements for individual customers (one customer at a time.) See the next section for bulk printing of account statements.

**Menu Path:** ACCOUNTING > FINANCIAL ACCOUNTING > ACCOUNTS RECEIVABLE > ACCOUNT > CORRESPONDENCE > REQUEST

Transaction Code: **FB12**

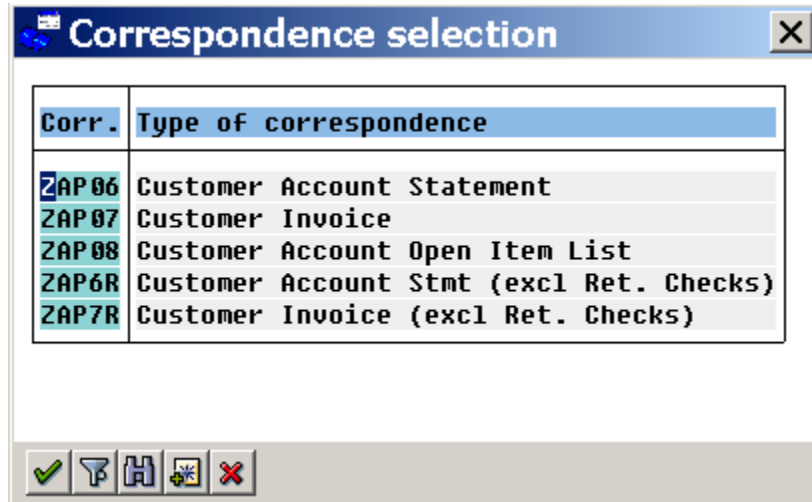

The first screen that appears is *Request Correspondence*.

**Company Code:** Enter company code

Press the Enter key or click the green checkmark icon  to continue.

The following screen appears.

The screenshot shows a window titled "Correspondence selection". It contains a table with two columns: "Corr." and "Type of correspondence". The table lists five options, with the first one highlighted in blue.

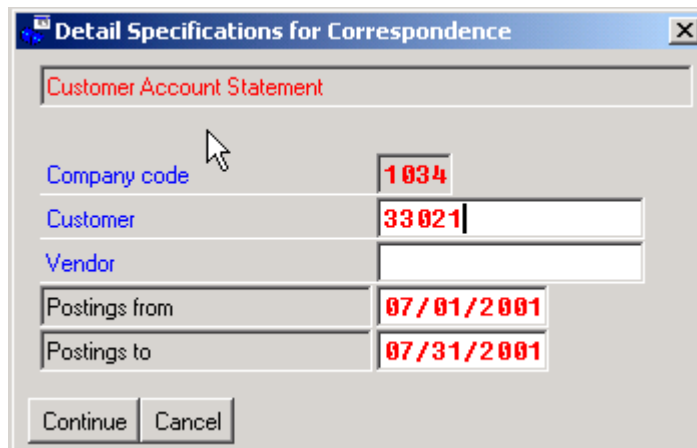

Corr.	Type of correspondence
ZAP06	Customer Account Statement
ZAP07	Customer Invoice
ZAP08	Customer Account Open Item List
ZAP6R	Customer Account Stmt (excl Ret. Checks)
ZAP7R	Customer Invoice (excl Ret. Checks)

At the bottom of the window, there is a toolbar with five icons: a green checkmark, a magnifying glass, a printer, a plus sign, and a red X.

Select **ZAP06 Customer Account Statement**

Press the Enter key or click the green checkmark icon  to continue.

Next Screen:

The screenshot shows a window titled "Detail Specifications for Correspondence". It displays the selected option "Customer Account Statement" in a red box. Below this, there are several input fields with labels in blue text. The "Company code" field contains "1034". The "Customer" field contains "33021". The "Vendor" field is empty. The "Postings from" field contains "07/01/2001". The "Postings to" field contains "07/31/2001". At the bottom, there are "Continue" and "Cancel" buttons.

Enter the following data:

<b>Company Code:</b>	defaults
<b>Customer:</b>	customer number
<b>Postings from:</b>	first day of current statement period
<b>Postings to:</b>	last day of current statement period

Click on the Continue Button .

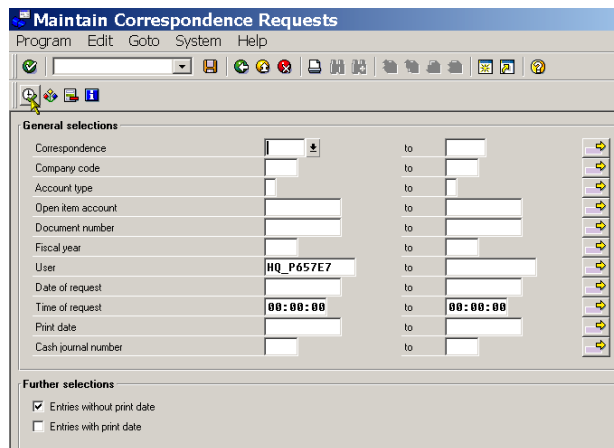

Back out into the main menu and go to the next menu path below:

Next, select:

**Menu Path:** ACCOUNTING > FINANCIAL ACCOUNTING > ACCOUNTS RECEIVABLE > ACCOUNT > *CORRESPONDENCE* > *MAINTAIN*

Transaction code **F.64**

User: User who created the initial request will default.

Click the Execute icon

A report will appear listing all statements that have been requested.

## Reports

General instructions:

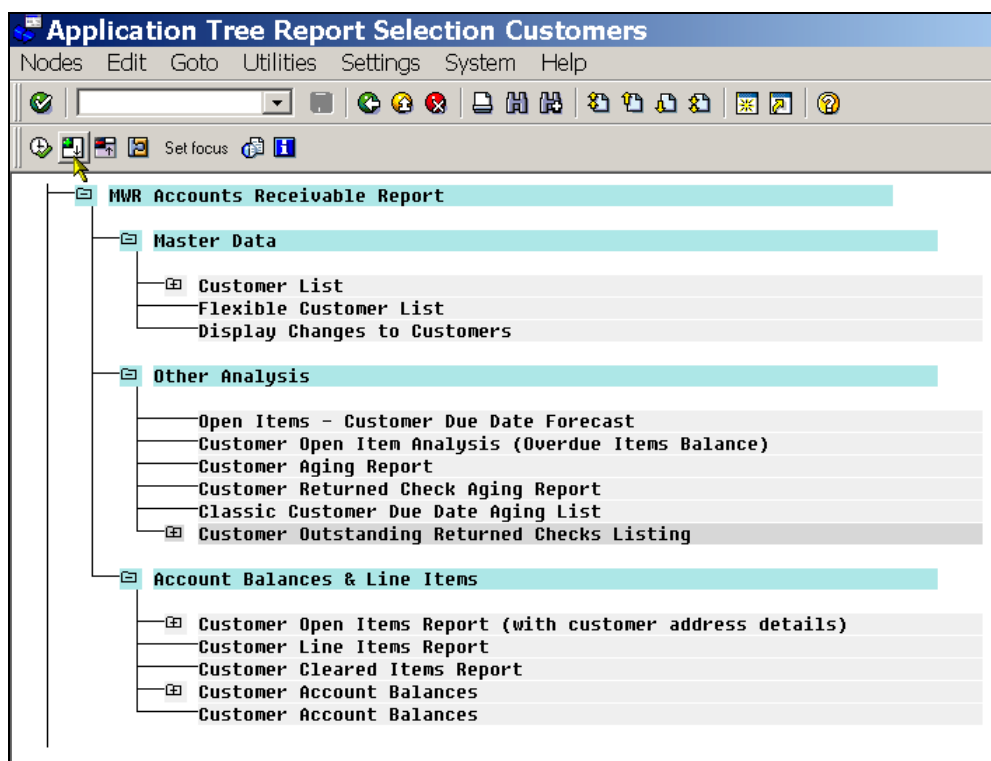

The following menu path will bring you to the report tree where you may select the reports you need.

**Menu Path:** ACCOUNTING > FINANCIAL ACCOUNTING > ACCOUNTS RECEIVABLE > PERIODIC PROCESSING > INFORMATION SYSTEM →> REPORT SELECTION> → MWR ACCOUNTS RECEIVABLE

(click on to open folders)

Select the report you wish to run. Some of the most common reports are: Write- Off Report, Display Changes to Customers, Customer Aging Report, Customer Returned Check Aging Report, Customer Outstanding Returned Check Listing, Customer Open Line Items, and Customer Account Balances.

There will be several fields in which to ask for information (e.g., for which customer(s) to run the report, for which company codes, etc). Select the fields on which you would like to base your report.

Click on the Execute Button

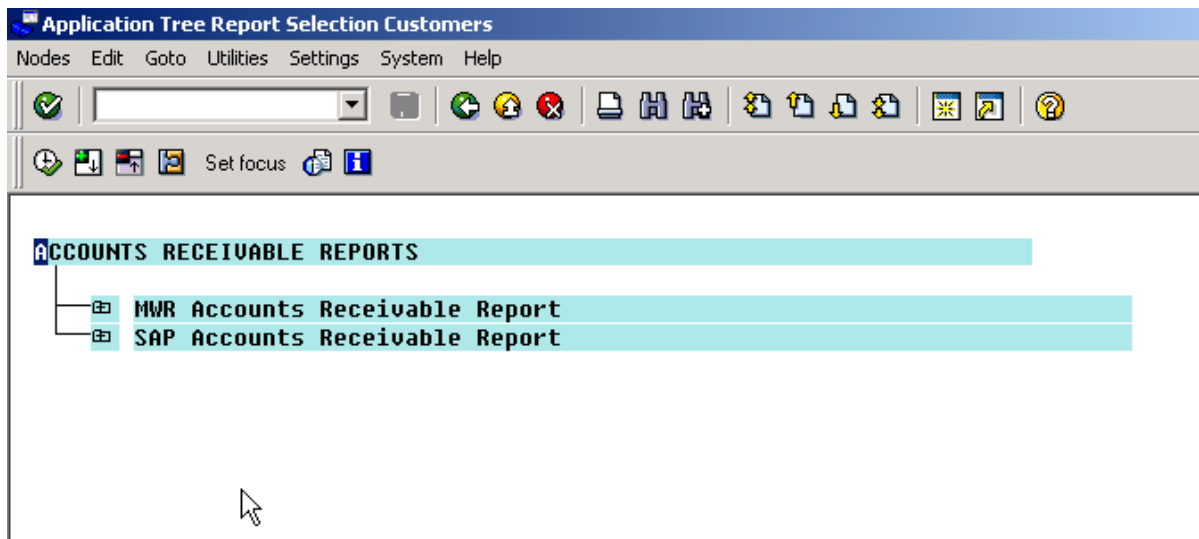

## CUSTOMER AGING REPORT

In order to ensure customer invoices are being paid on a timely basis, written off after 180 days and not aging excessively, a report can be executed to identify any customer invoice that is “overdue.” Use the following menu path to execute this report:

**Menu Path: ACCOUNTING>FINANCIAL ACCOUNTING>ACCOUNTS RECEIVABLE> PERIODIC PROCESSING> INFORMATION SYSTEM>REPORT SELECTION**

*Initial Screen:*

Within the Report tree, select: Click on the file icon beside each selection.  
Then select this pathway within the report tree:

**MWR ACCOUNTS RECEIVABLE REPORTS>OTHER ANALYSIS>CUSTOMER AGING REPORT.**

Customer Aging Report Screen

Program Edit Goto System Help

**Customer selection**

Customer account  to

Company code  to

**Line item selection**

Open items at key date

**Report selections**

Due date analysis  Analysis of line ite

**Output type**

☐ graphical report-output  
☐ Classic drilldown report  
☒ Object list (more than one lead column)

Enter the following data:

<b>Customer:</b>	Leave the “customer” field blank as you will want to have the system check ALL customers for items needing to be written off. *If aging data is needed on a specific customer the customer number or range of customer numbers can be put entered. However, only those customer numbers entered will be displayed in the report.
<b>Company Code</b>	Enter appropriate company code
<b>Open Items at Key Date:</b>	Should be set at the date you wish to view “overdue items” . The system will default in the current date but remember to change the date if you want a specific period ending date or effective date.
<b>Due Date Analysis:</b>	Should have a default value of “1”
<b>Output Type</b>	Ensure “object list (more than one lead column)” is checked

Now click on the “execute” button

**In order to properly view this report, you must select the Display Variant “AIMS 01-AIMS Customer Aging”**

Review this report carefully.

This report does NOT have drill down capability. Instead, create another session and using Customer Line Item Display, and review each overdue item. (Note: Credit memos, credits on customer accounts and payments are reflected with a “negative” number- a credit entry)

It will become increasingly important for field activities to monitor their Accounts Receivable balances and Aging very carefully. The report as listed above supplements the standard aging report by allowing a report that narrows down the overdue accounts to a specific period (number of days overdue.)

**Please remember to run this process FREQUENTLY- at least once a month. Ensure items are written off promptly (in accordance to policy) with the Commanding Officer’s approval.**

## WRITE OFF REPORT

In order to ensure customer invoices are being written off after 180 days and not aging excessively, a report can be executed to identify any customer invoice that is “overdue” and needs to be written off. Use the following menu path to execute this report:

**Menu Path: ACCOUNTING>FINANCIAL ACCOUNTING>ACCOUNTS RECEIVABLE> PERIODIC PROCESSING> INFORMATION SYSTEM>REPORT SELECTION**

*Initial Screen:*

Within the Report tree, select: Click on the file icon beside each selection. Then select this pathway within the report tree:

**MWR ACCOUNTS RECEIVABLE REPORTS>OTHER ANALYSIS>CUSTOMER WRITE OFF REPORT**

Customer Write-Off Report Screen

**Selection: Customer Write-off Report**

Program Edit Goto System Help

**Customer selection**

Customer account [ ] to [ ]

Company code 1034 to [ ]

**Line item selection**

Open items at key date 08/08/2001

**Report selections**

Due date analysis 1 Analysis of line item

Days for net due date 181

**Output type**

☐ graphical report-output

☐ Classic drilldown report

☒ Object list (more than one lead column)

Enter the following data:

<b>Customer:</b>	Leave the “customer” field blank as you will want to have the system check ALL customers for items needing to be written off.
<b>Company Code</b>	Enter appropriate company code
<b>Open Items at Key Date:</b>	Should be set at the date you wish to view “overdue items” . The system will default in the current date but remember to change the date if you want a specific period ending date or effective date.
<b>Due Date Analysis:</b>	Should have a default value of “1”
<b>Days for Net Due Date</b>	Enter the number of days for which customer invoices are overdue In this report, you are primarily trying to identify those customers’ invoices that need to be written off. Enter 181 days (or more)

Now click on the “execute” button

**In order to properly view this report, you must select the Display Variant “AIMS 03-AIMS Standard FIS Overdue Analysis.”**

Review this report carefully.

This report does NOT have drill down capability. Instead, create another session and using Customer Line Item Display, and review each overdue item. (Note: Credit memos, credits on customer accounts and payments are reflected with a “negative” number- a credit entry)

Please remember to run this process FREQUENTLY- at least once a month. Ensure items are written off promptly (in accordance to policy) with the Commanding Officer’s approval.

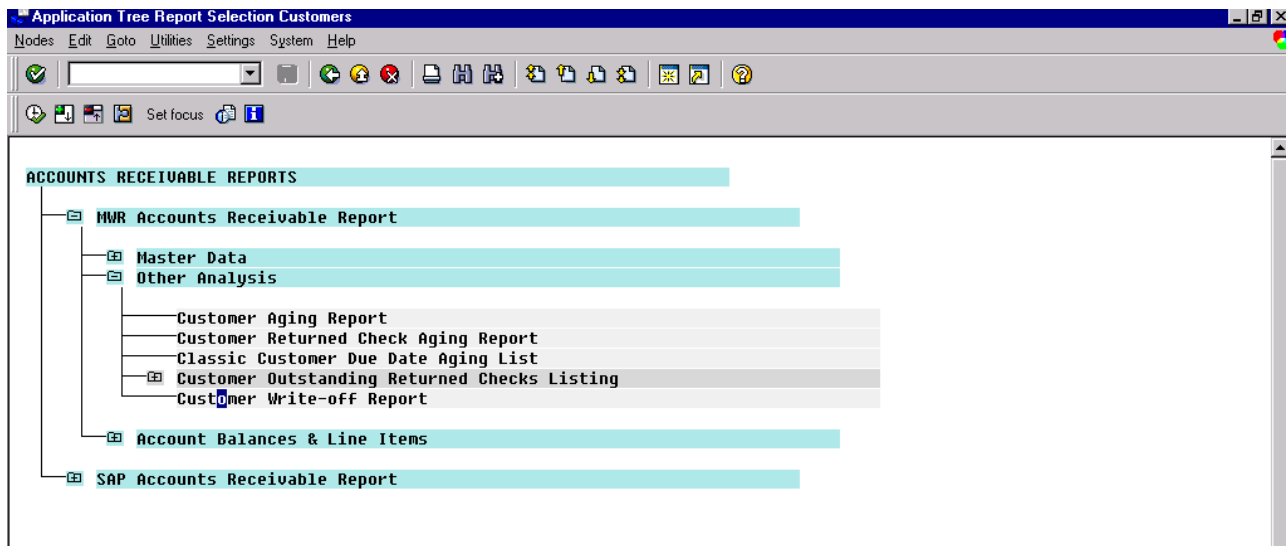

### **Customer Accounts Receivable Write-off Report Using Variable Days**

It will become increasingly important for field activities to monitor their Accounts Receivable balances and Aging very carefully. The report as listed above supplements the standard aging report by allowing a report that narrows down the overdue accounts to a specific period (number of days overdue.) You may enter any specific number of days.

The menu path to arrive at this screen is:

**Menu Path: ACCOUNTING > FINANCIAL ACCOUNTING > ACCOUNTS RECEIVABLE > PERIODIC PROCESSING > INFORMATION SYSTEM > REPORT SELECTION**

**Transaction: F.99**

Double-click on the Report Selection node to see the above screen.

The report that we are interested in is the **Customer Write-off Report** as listed under the Report tree ACCOUNTS RECEIVABLE REPORTS > MWR Accounts Receivable Report > Other Analysis > Customer Write-off Report.

The following Criteria Selection window will show:

Enter your company code. For this example, we are using NAS Jacksonville 1034.

**Selection: Customer Write-off Report**

Program Edit Goto System Help

Select (by double-clicking) the items you want to clear. Selected items will appear in blue or red.

Selected items must equal 0.00 (at bottom right corner of screen) in the field called “Not Assigned.”

If clearing is possible, save .

Items will now be cleared or closed.

## Manual Clearing of Open Items when Payment Differs from Open Item Amount

**Menu Path:** ACCOUNTING > FINANCIAL ACCOUNTING > ACCOUNTS RECEIVABLE > ACCOUNT > CLEAR

Transaction Code: **F-32**

**The Opening screen:** Clear Customer: Header Data

The screenshot shows the 'Clear Customer: Header Data' window. At the top, there's a menu bar with 'Document', 'Edit', 'Goto', 'Settings', 'System', and 'Help'. Below the menu bar is a toolbar with various icons. The main area is divided into sections. The first section contains input fields for 'Account' (33015), 'Clearing date' (11/07/2001), 'Period' (2), 'Company code' (1353), and 'Currency' (USD). Below this is the 'Open item selection' section, which has a checked radio button for 'Normal OI' and a dropdown for 'Special G/L ind.' set to 'R'. The 'Additional selections' section contains a list of radio buttons for various criteria: None, Assignment, Site, Amount, Document number, Posting date, Reference, Document type, Business area, Posting key, Document date, and Net due date.

Use the following table for guidance in filling out this initial screen:

The Field Name	The Proper Entry
Account	<b>Customer Number</b>
Clearing Date	Enter today's date
Company code	The four digit Company code
Special G/L ind.	Enter "Special GL indicator if needed" (Example is a Returned Check partial payment clearing)

We then click on the Process open items  push button.

Once you have the expected open items on the screen, you can proceed to clear them. Make sure the open items are highlighted (either red or blue). They may appear this way when you first see the screen, or you may have to select them manually by double-clicking on each item individually. You will notice that there is an “out of balance” condition when we open the first screen and to properly clear this transaction, we must adjust the way the system will clear the selected open items.

**Clear Customer: Create residual items**

 Currency: USD  
 Display in clearing currency:

Amount entered: 0.00  
 Assigned: 100.00  
 Difference postings:  
 Not assigned: 100.00-

To do this follow the steps outlined below:

1. Click on the Residual Items tab, labeled **Res. Items**.
2. Notice that the two line items are not equal. In our example, the 09 entry is \$250.00 and the 19 entry (partial payment) is \$100.00.
3. Click on the column labeled **Residual Items** for each item.. The 09 line payment amount must be changed to 150.00 the amount that we have remaining. Note that the “sign” when changing the **Residual Items**.

4. At this point we may click the “Document Overview” push-button  to check the equality of the transactions. This will show a blank window with no details on it.

Choose the menu path Document > Simulate and the system calculate and create the necessary residual item amount. In the example, a residual item for \$150.00 was created.

Notice the screen below. You will need to correct the marked items (your new residual item: Double click on the entry that you need to change.

**Clear Customer: Display Overview**

**IMPORTANT: YOU NEED TO MAKE THESE CHANGES SO THAT ALL AGING AND DUNNING PROCESSES ARE CORRECT.**

**Returned checks: Reenter the Reference field with the check number, Doc Header Text with Bank name and Text field with Reason bank returned check IMPORTANT: Change the DUE ON DATE to the original date of returned check so aging is correct.**

**Regular Invoices: Reenter reference and text fields as was entered on original invoice. Change Bline Date to the date of original invoice and change payment terms to NET DUE IMMEDIATELY so aging will be correct.**

Now click on the “Document Overview” push-button  to return to the Document Overview screen.

As you can see from the Display Overview screen the Debits equal the Credits and the document can now be saved by clicking on the Save  icon. Of course, the 10-digit document number should be recorded on the travel claim paperwork.

## Resetting Cleared Items

This transaction is used when it is determined that an error has been made after a customer account has been cleared. **If it is determined that you have cleared items incorrectly or matched items incorrectly, you may need to “reset” the clearing process you just completed above.** In effect, this transaction “breaks” the clearing and results in all the items for being reset as “open”. At that time, the correction can be made and items manually cleared again if necessary.

**Menu Path: ACCOUNTING > FINANCIAL ACCOUNTING > ACCOUNTS RECEIVABLE > DOCUMENT > RESET CLEARED ITEMS**

Transaction Code: **FBRA**

Only cleared posted documents can be reset and cleared.

### Initial Screen:

### Enter the following data:

<b>Clearing Document:</b>	Enter Document number to be cleared
<b>Company Code:</b>	Enter Company code
<b>Fiscal Year:</b>	Enter Fiscal Year

To review the items to be reset, click on “Items”

If you are sure you want to reset the cleared items, click on the green back arrow button 

To review the accounts affected (customer accounts), click on “Accounts”

Press the Enter key or click the green checkmark icon  to continue.

Click on the SAVE Button  to reset clearing

Next Screen:

Here you have a choice. If you click on the Only Resetting Button, you will reverse the clearing of the two documents (invoice and payment), and they will fall back to being open items again. **USE the “ONLY RESETTING” button!!!**

If you click on the **Resetting and Revers Button**, you will reverse the clearing of the two documents (invoice and payment), **but you will also reverse the payment document completely**. This transaction should be used with great care, please you understand the effect this will have if selected.

For this situation we want to Reset.

**Click on the Only Resetting button**

## Dunning

Dunning is actually the process by which you “bill” or “invoice” a customer for past due items. This process results in the production of a DD139 for garnishment of wages. At MWR, VQ, NFC, and CIVNAFI, **dunning will mainly be used to attempt debt retrieval on bad checks** (or bad debts - overdue receivables) for the active duty military, retirees and reservists. For all other groups of customers, an ad hoc statement of the account (account statement) will be produced as required.

The procedure followed by MWR, VQ, NFC, and CIVMWR for retrieval of bad checks is as follows:

- **Step 1:** Phone call to customer on receipt of bad check – at this stage, perform posting outlined in paragraph on Returned Checks above
- **Step 2:** Letter to customer (+10 days)
- **Step 3:** Letter to CO (+7 days)
- **Step 4:** Legal letter to customer (→ DD139) (+13 days)
- **Step 5:** Issue DD139 (+10 days)
- **Step 6:** Follow-up on DD139 (dispensing officer) (+45 days)
- **Step 7:** Write-off (after 6 months)

### **REMINDER:**

**CHANGE CUSTOMER MASTER RECORDS TO INCLUDE CO ADDRESS, PAYMASTER ADDRESS, DISPENSING OFFICER NAME, ETC BEFORE PRINTING OUT DUNNING LETTERS FOR LEVELS 2, 4, and 5 SEE PROCEDURE ON PAGE III-143**

Steps 2-6 above will be handled by dunning levels in SAP.

The levels of dunning for active duty military, retirees and reservists are as follows:

- **Level 1:** Letter to customer (+10 days after receipt of bad check)
- **Level 2:** Letter to CO (+7 days)
- **Level 3:** Legal letter to customer (→ DD139) (+13 days)
- **Level 4:** Issue DD139 (+10 days)
- **Level 5:** Follow-up on DD139 (dispensing officer) (+45 days)

This process is an external process.

***Reminder - In dunning letters, include reference to service charge in text of letter. Amount posted to Accounting system is only the face value of the returned check.***

**NOTE:** Before starting, the military customer must have the Dunning procedure 2000 filled in on the customer master record, as indicated below. Also, note that if the Grouping key is entered as 01, then when dunning occurs, each open item that qualifies for dunning will be processed on a separate dunning notice. If the Grouping key is left blank, all open items that qualify for dunning will appear as separate line items on one dunning notice.

## DUNNING PROCESS

**Menu Path:** ACCOUNTING > FINANCIAL ACCOUNTING > ACCOUNTS RECEIVABLE > PERIODIC PROCESSING > DUNNING

Transaction Code: **F150**

The screenshot shows the 'Dunning' window. The 'Run on' field has a question mark in the dropdown, and the 'Identification' field also has a question mark. The 'Status' tab is active, displaying the message 'No parameters maintained'.

**Run Date** is today's date (must be manually entered in this field). **Identification** is User initials and number, (e.g. RUN001).

**NOTE:** Whenever you schedule a dunning run, the "Run Date" and "Identification" number must not be the same. You may run several dunning runs on the same date but the "Identification" name must be different. Alternatively, the "Identification" name may be the same as long as the "Run Date" is different.

Click on the "***Parameters***" tab.

**NOTE:** Maintaining Parameters. Parameters are limiting criteria that include the date of issue, dunning period, company codes and customer account numbers. Click on the '**Parameter**' tab.

The following screen appears:

Enter the following data:

<b>Dunning Date:</b>	Today's date
<b>Documents posted up to:</b>	This date defines the period covered in the dunning run.
<b>Company Codes:</b>	XXXX
<b>Customers from:</b>	1
<b>Customers to:</b>	99999999999

**NOTE:** The above example will run the dunning program for all customers in that company code. To run a dunning on a single customer, just enter the customer's account number in the "Customers from" field. To run a dunning on a select series of customers, enter the appropriate range of customer numbers.

Click on "**Free Selection**" tab. Enter the following information in order to dun Returned Checks customers only.

In the field name, click on the drop down menu

Click on the SAVE Button .

Click on '**Status**' tab.

The screen will now appear as follows:

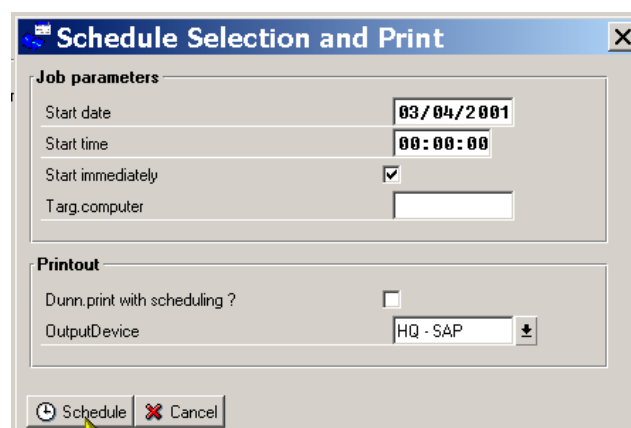

Click on  button.

Verify correct date and time

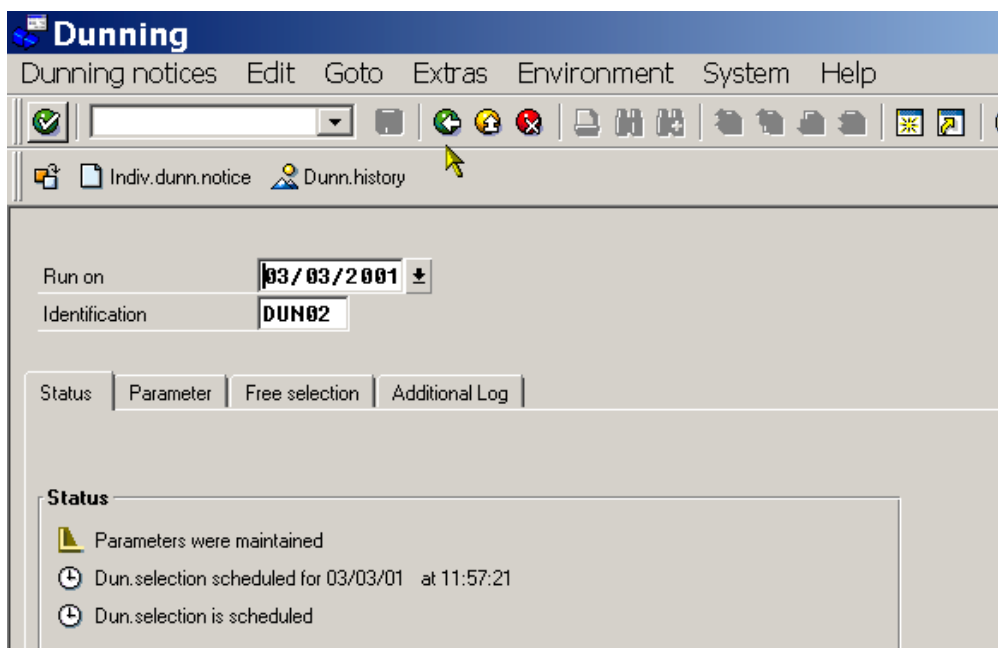

Click in Start immediately field

Enter printer name. Click on the '**Start Immediately**' field when you select the printer.

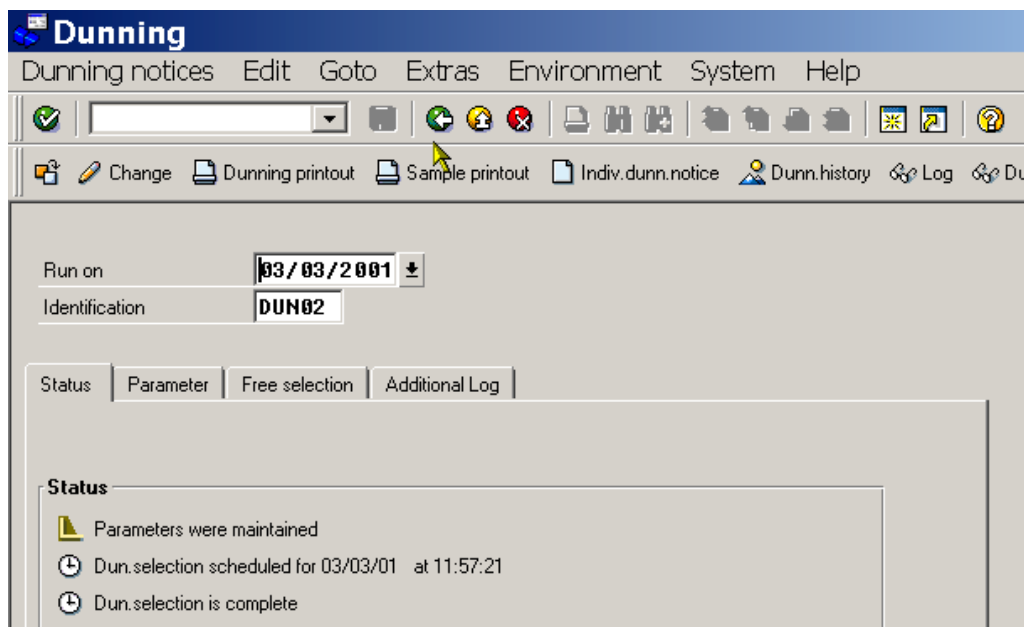

Press the  icon.

The following screen appears:

Select **Edit > Refresh** or press Enter until Dunning Selection is scheduled.

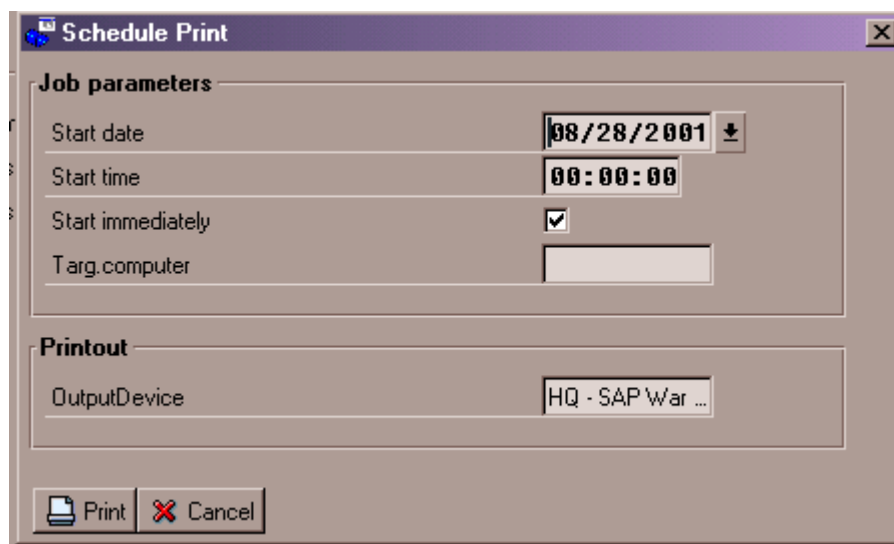

The following screen then appears showing that the Dunning selection process is complete:

The next step is to schedule the dunning notice printout run.

Click on the button that reads  Dunning printout.

The following screen appears

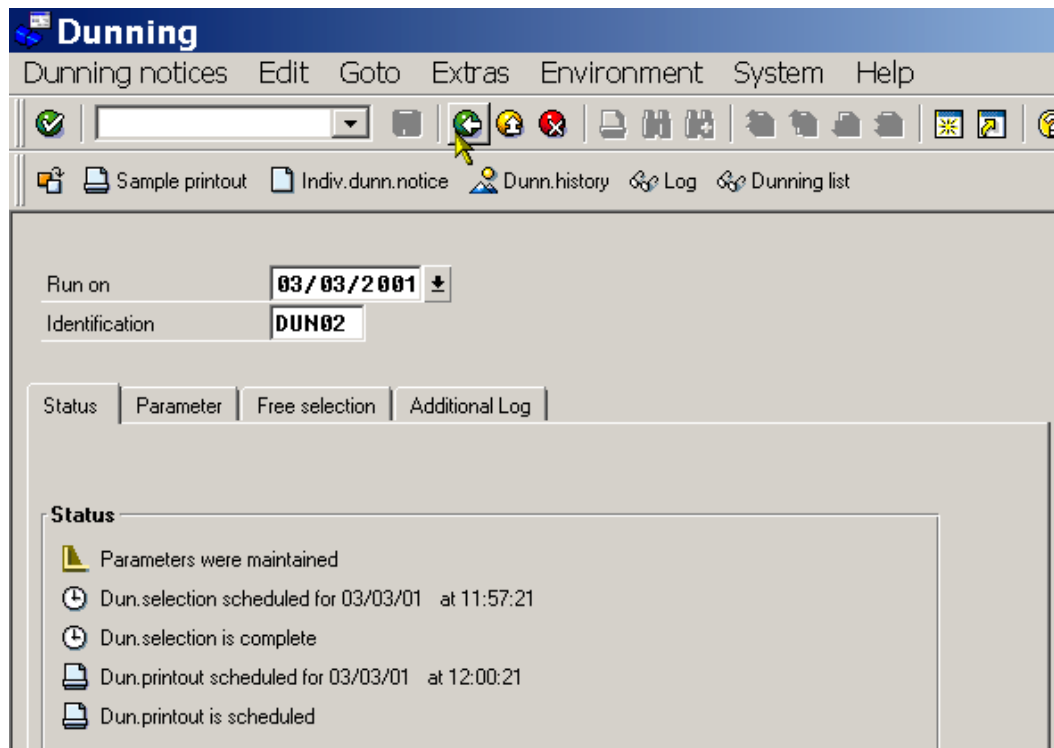

The 'Schedule Print' dialog box contains two main sections: 'Job parameters' and 'Printout'. In the 'Job parameters' section, the 'Start date' is set to '08/28/2001', 'Start time' is '00:00:00', 'Start immediately' is checked, and 'Targ.computer' is empty. The 'Printout' section shows 'OutputDevice' as 'HQ - SAP War ...'. At the bottom are 'Print' and 'Cancel' buttons.

Enter start date, flag “**Start immediately**” and enter printer name.

Then click on the Print icon.

A screen appears stating that the Dunning printout has been scheduled.

The 'Dunning' application window shows a menu bar (Dunning notices, Edit, Goto, Extras, Environment, System, Help) and a toolbar. Below the toolbar are tabs for 'Sample printout', 'Indiv.dunn.notice', 'Dunn.history', 'Log', and 'Dunning list'. The main area has 'Run on' set to '03/03/2001' and 'Identification' set to 'DUN02'. Below this are tabs for 'Status', 'Parameter', 'Free selection', and 'Additional Log'. The 'Status' tab is active, showing a list of events: 'Parameters were maintained', 'Dun.selection scheduled for 03/03/01 at 11:57:21', 'Dun.selection is complete', 'Dun.printout scheduled for 03/03/01 at 12:00:21', and 'Dun.printout is scheduled'.

Select **Edit > Refresh** or press Enter until Dunning has finished.

**BEFORE YOU FINISH PRINTING, CHANGE THE CUSTOMER MASTER RECORD TO ENTER FIELDS IN DUNNING DOCUMENTS. SEE THE END OF THIS SECTION FOR DIRECTIONS ON ENTERING THESE FIELDS.**

**After completing the changes in the customer master record: you may continue to print out dunning documents**

The bottom line above on the screen will then state that Dun. Printout is complete. In order to kick off the print process, you must click on “SYSTEM”, then “OWN SPOOL REQUEST”, select your job and click on “PRINT DIRECTLY”

### **CHANGING CUSTOMER MASTER RECORDS FOR DUNNING**

**Before dunning printing can take place, you first have to change the customer master record in order to add Commanding Officer’s address, Paymaster address, Accountable D.O name, and Certifying Officer name into the Dunning letters.** You have to enter the appropriate names and addresses for your base in order for them to appear on the dunning letters and the DD139.

First navigate to the Change Customer Master Record screen.

**Menu Path: LOGISTICS > RETAILING > MASTER DATA > EDIT CUSTOMER > BUSINESS PARTNER > CUSTOMER > CHANGE > FULL**

Transaction Code: **XD02**

On the screen titled “Change Customer: Initial Screen”, enter information in the fields as specified in the table on the next page.

Change Customer – Initial Screen

Enter the following data.

If you were to display the customer master record at this point (Menu Path: **ACCOUNTS RECEIVABLE > MASTER RECORD > DISPLAY**), it will show the date of dunning and the highest level to which the customer has been dunned.

## Unit Allocation Funds

### (Unit Allocation Funds and Funds Held on Behalf of Commands)

There are several scenarios relating to allocation funds and fund held on behalf of commands that will be addressed:

1. Command deposits funds with MWR from a fundraiser
2. Command issued request for full withdrawal of funds
3. Command issued request for partial withdrawal of funds
4. Command issued request for allocation funds
5. Command withdrawal of allocation funds
6. Command issued request for “payment” of funds to MWR activity
7. Command issued request for payment of funds to third-party vendor

All payments for Unit Allocation Funds (and funds held by MWR on behalf of Tenant Commands for such things as fund-raisers, etc) are recorded through SAP using customers. All amounts will be recorded through Deposits Payable (203001) – both Unit Funds and “fundraiser” monies deposited with MWR. Unit Allocation Funds are also provided through MWR (\$10 per sailor per year) and expensed through Unit Allocations Expense (786).

Local MWR business offices should ensure a clear business procedure is established. A Command Funds Request Letter Form should be created for use by requesting commands. The form should include the following information per instruction 1710.11C:

- Command name and address
- UIC
- Telephone number
- Full name of the Payee (if the check is to be made payable to an individual versus the Command)
- Fiscal quarter the Unit Funds are being requested for (e.g. 1<sup>st</sup> quarter, 2<sup>nd</sup> quarter, etc)
- Number of active duty members
- Current roster of active members of the command (head count)
- Total amount of monies being requested
- Indication whether the request is for Unit Allocation monies or Fund Raiser monies (or both) (use checkboxes)
- Authorized signature for the Command

Other useful information that should appear on the Command Funds Request Letter Form or alternatively, a separate Payment Request Form includes the following:

- Customer account number - this information should be completed by the MWR AR technician only
- Indication whether request is a partial refund of funds or a full refund of funds (use checkboxes) – this box should be completed by the MWR AR technician only and marked as such

- Indication whether the requested dollar amount and the customer's deposit balance has been reviewed in the system (use checkbox) – this box should be completed by the MWR AR technician only and marked as such
- Indication whether the payment request is for a deposit (special G/L indicator "D")
- Document number – this information is useful when processing Partial Withdrawals since a particular open item (i.e. unit allocation) can be isolated and processed correctly

The AR technician's role when processing the refund request form is critical since they will determine the Command's fund balance. They can then determine whether there are sufficient funds for the requested refund and, if so, they can determine whether the refund is partial or full.

The AR Technician must also confirm that the Payee listed on the request form is the same POC name that appears in **the Name 2 field on the Command's customer master record**. This is imperative since the system will use the Name 2 field as the payee on the check. The user executing the automatic check payment run or creating the "hot" check is not authorized to change the payee name.

### Command Deposits Funds with MWR from a Fundraiser

Commands sometimes hold fundraising events for the benefit of their members. Since Commands are not supposed to maintain their own bank accounts, they utilize local MWR business offices to deposit the proceeds from fundraising events for safekeeping. When MWR receives such funds they are deposited in the local depository bank account just like any other DAR cash receipt. These monies are not revenue to MWR, of course. Instead, they are accounted for as deposits payable and posted to the Command's customer sub-ledger account in the SAP system.

The special g/l indicator "D" can be used with customer line items to direct the credit amount to the DEPOSITS PAYABLE g/l account. A summary of this journal is shown below:

Example: A Command has a fundraiser and deposits \$300.00 with MWR and subsequently requests their \$300 for their XMAS party (not held at an MWR facility).

### DAR Only (assume cash cage journal is performed as usual)

DR (PK 40)	DAR/POS Clearing Account (101060)	300.00	
CR (PK 19 "D")	Customer Account (203001)		300.00

### Command Issued Request for Full Withdrawal of Funds

Upon written request, Commands are entitled to withdrawal funds that are being held on their behalf by MWR. Once MWR receives the appropriate form outlining the details of the withdrawal the AR Technician (responsible for allocation funds and funds held) should make an assessment whether this withdrawal is a full withdrawal of the Command's funds or a partial withdrawal.

If it is determined that the request is a full withdrawal then a check can be created automatically during the regular check payment run. A "hot check" can also be created for full withdrawals of funds, if necessary. **A request for payment form should be given to the accounts payable technician stating the Command's customer number and that the payment is a full payment (partial payment is discussed below). Also the special G/L indicator "D" should be noted on the form.**

The automatic payment run parameters will be adjusted to include the particular Command customer account number, and a payment will be generated. The user executing the payment run will need to unblock the item in the payment proposal since all customer credit open items are automatically blocked for payment to prevent accidental payments.

A summary of the payment journal (created automatically by the payment program) is shown below:

Example: A Command has funds totaling \$300.00 deposited with MWR. The Command submits a request using the approved form to withdraw all of their funds. The Command will be paying a third-party (not an MWR facility) directly for hosting their Christmas party.

DR (PK 09 "D")	Customer Account (203001)	300.00	
CR (PK 50)	Inter-company Cash (101005)		300.00

### Command Issued Request for Partial Withdrawal of Funds

This scenario really is the alternative to the full withdrawal of funds described above. If the AR Technician determines that the request from the Command is a **partial withdrawal** then a **"hot" check must be created** (partial withdrawals of funds cannot be processed through the automatic check payment runs). **A request for payment form should be given to the accounts payable technician stating the Command's customer number and that the payment is a partial payment. Also the special G/L indicator "D" should be noted on the form.**

A summary of the payment journal (posted automatically when the "hot" check is created) is shown below:

Example: A Command has funds totaling \$300.00 on deposit with MWR. The Command submits a request using the approved form to withdraw some of their funds (\$200.00). The Command will be paying a third-party (not an MWR facility) directly for hosting their Christmas party.

DR (PK 09 "D")	Customer Account (203001)	200.00
CR (PK 50)	Inter-company Cash (101005)	200.00

NOTE to Accounts Payable Section – you MUST process Partial unit fund withdrawals using the "HOT" CHECK procedure !!!!

### **Command Issued Request for Allocation Funds**

Tenant Commands are authorized to draw \$10 per active duty member per year (or \$2.50 per quarter) from MWR NAF Funds. These funds are used to support Command functions that benefit all members. Requests for Unit Funds must follow policies as set forth in 1710.11C and include a request from the Tenant with appropriate signature, a roster of active duty members, and receipts supporting purchases. When payments are made to Tenants by MWR, an offsetting entry is made the 786000 (Unit Allocations Expense).

A summary of the journal is shown below:

Example: A Command has requested their allocation funds for the year be issued them. Their request form states that they are seeking \$700.00 since they have 70 active roster personnel (70 persons @ \$10.00 per person per year = \$700.00).

**NOTE: The person chosen to do Unit Allocations should know the amounts of any previous fund allocations to the Command making the request prior to transfer and/or payment to prevent over-allocations.**

### **Unit Allocation Expense**

DR (PK 40)	Unit Allocation Expense (786000)	700.00
CR (PK 19 "D")	Customer Account (203001)	700.00

### **Command Withdrawal of Allocation Funds**

When a Command requests allocation funds, it can request that the funds be issued to them by check. The Command should submit supporting receipts for purchases that they made for which they are seeking to apply their allocation funds. Generally, requests are made to cover the cost of the purchases. Sometimes Commands make use of the MWR Purchasing Department for certain purchases. If this is the case, the Purchasing Department should provide a copy of the purchase order to the designated Unit Funds AR Technician to their convenience when reviewing the Command's fund withdrawal request.

## Retail (MM)

---

If the Command requests that a check be issued to them then the following journal will be made automatically by the check payment run or during the creation of a “hot” check:

Example: The Command also indicated on the request described in the previous example that these funds will be used for Command party that will be held at a third-party facility (not an MWR facility). The Command will pay the cost of the party themselves using the funds they have been allocated.

DR (PK 09 “D”)	Customer Account (203001)	700.00	
CR (PK 50)	Inter-company Cash (101005)		700.00

### Command Issued Request for “Payment” of Funds to MWR Activity

Some Commands will hold events at MWR facilities, but will not pay the cost of the event directly. Rather, they will want to apply their allocation funds or other funds held on their behalf to the cost of the event. MWR facilities are only “allowed” to charge for the cost of the materials and labor and not earn any profit on their events. Rather than simply create a “mess requisition” journal to record the cost of the event, the revenue (even though there will be no profit) should be recorded as well. This will ensure that the volume of sales activity is properly reflected in the P&L of the MWR facility hosting the event. This way the MWR facility’s financial performance will not be unnecessarily penalized. The COGS for the event will be recorded using the normal procedure at month-end (inventory count and COGS journal). MWR facilities using MICROS POS systems should record the party contract as usual, except that the revenue (sales price) should **equal (not exceed) the cost of the materials and labor**.

If the Command wishes to apply their funds to the cost of an event at an MWR facility, one of the following journals will be made:

Example: The Command has held their Christmas party at the Officer’s Club. The party cost the facility \$600.00 in labor \$400.00 in food and other materials, which they recorded on a party contract. The Command has submitted the documentation showing the cost of the party to the MWR Business Office.

The Command wants to use both its unit allocation funds of \$700.00 (see the example above for the journal) and the balance funds being held on their behalf (earned from fundraisers) to pay the debt.

#### A. Sufficient Funds

After reviewing the Command’s customer sub-ledger, it was determined that there are enough funds to pay the all of the party costs. The Command has \$700.00 in allocation funds and \$300.00 from fundraisers on deposit with MWR.

**Party Contract (record revenue as cost of the event only – no profit)**

DR (PK 09 “D”)	Customer Account (203001)	1000.00
CR (PK 50)	Catering Revenue (302000)	1000.00

**B. Insufficient Funds**

After reviewing the Command’s customer sub-ledger, it was determined that there are not enough funds to pay the all of the party costs which turned out to be \$1400.00, not \$1000.00 as expected. The Command only has \$700.00 in allocation funds available and \$300.00 in other funds on deposit with MWR. Since the Command did not pay for any portion of the party, an ordinary receivable for \$400.00 will also have to be recorded.

**Party Contract (record revenue as cost of the event only – no profit)**

DR (PK 09 “D”)	Customer Account (203001)	1000.00
DR (PK 01)	Customer Account (131005)	400.00
CR (PK 50)	Catering Revenue (302000)	1400.00

**Command Issued Request for Payment of Funds to Third-party Vendor**

Some Commands will hold events outside of the base, at private facilities, such as hotels, restaurants, or banquet halls. Rather than pay these third-party vendors directly, they will ask the vendor to invoice MWR for the cost of the event. MWR would then pay the invoice using the Command’s allocation funds and other funds held on their behalf.

Of course, MWR will not just pay any invoice submitted by a vendor. A purchase order and goods receipt must exist before an invoice will be posted and then paid. As such, when a Command is planning an event using a third-party vendor’s facility, they should arrange the details through the MWR Purchasing Department when they plan on requesting their unit allocation funds or other funds be used to pay for the event. This way a Contracting Officer in Purchasing can create a purchase order. **The PO item should be assigned to g/l account 203000 and an appropriate cost center (probably G&A for the Base where the tenant command is located).** It is important for the Contracting Officer to contact the designated Unit Funds AR Technician to ensure that they Command has sufficient funds on deposit to “cover” the amount of the purchase order.

Once the event has been held, a goods receipt must be posted in the system. This should be done when the Command’s request and documentation are approved and submitted. The third-party vendor’s invoice is entered and paid following the regular invoice verification process.

**Example: The Command has held their Christmas party at the Holiday Inn hotel. This party was organized with the assistance of the MWR Purchasing Department, who created a purchase order for Holiday Inn to hold the party. The amount of the purchase order was \$1600.00 and was assigned to g/l account 203000.**

The Command notifies MWR that the event was completed successfully was submitting their unit fund withdrawal request form and documentation to the MWR business office. The Command’s \$700.00 in allocation funds are recorded (see Unit Fund Allocation Request example above for this journal).

**Goods Receipt (upon notification by Command that event was successful)**

DR (PK 40)	Deposits Payable (203000)	1600.00
CR (PK 50)	GR/IR Account (201010)	1600.00

**Invoice Verification (when invoice is received from third-party-vendor)**

DR (PK 40)	GR/IR Account (201010)	1600.00
------------	------------------------	---------

CR (PK 31)	Vendor Account (201000)	1600.00
------------	-------------------------	---------

If the Command wishes to apply their funds to the cost of an event at a third-party vendor's facility, the following journal will be made:

The Command wants to use both its unit allocation funds of \$700.00 (see the example above for the journal) and the balance funds being held on their behalf (earned from fundraisers) to pay the debt.

#### A. Sufficient Funds

It turned out that the party cost only \$1000.00. The purchase order was amended and the goods receipt posting was corrected to reflect the reduction in cost. After reviewing the Command's customer sub-ledger, it was determined that there are enough funds to pay the all of the party costs to the third-party vendor. The Command has \$700.00 in allocation funds and \$900.00 from fundraisers on deposit with MWR.

### Third-party Vendor Event

DR (PK 09 "D")	Customer Account (203001)	1000.00
CR (PK 50)	Deposits Payable (203000)	1000.00

#### B. Insufficient Funds

The party cost \$1600.00 as stated in the purchase order. After reviewing the Command's customer sub-ledger, it was determined that there are not enough funds to pay the all of the party costs to the third-part vendor. The Command only has \$700.00 in allocation funds available and no other funds on deposit with MWR. Since the Command did not pay for any portion of the party, an ordinary receivable for \$900.00 will also have to be recorded.

### Third-party Vendor Event

DR (PK 09 "D")	Customer Account (203001)	700.00	
DR (PK 01)	Customer Account (131005)	900.00	
CR (PK 50)	Deposits Payable (203000)		1600.00

## Scenario One: Command Deposits Funds with MWR from a Fundraiser

The following procedure is a standard DAR posting for a customer, except that special g/l indicator “D” is used to record the funds received from the customer a Deposit Payable.

Menu Path: Accounting > Financial Accounting > General Ledger > Document Entry > GL Accounting Posting

Transaction Code: F-02

**First screen:** Enter G/L Account Posting: Header Data

Use the following table to guide you with the correct entries for the window above.

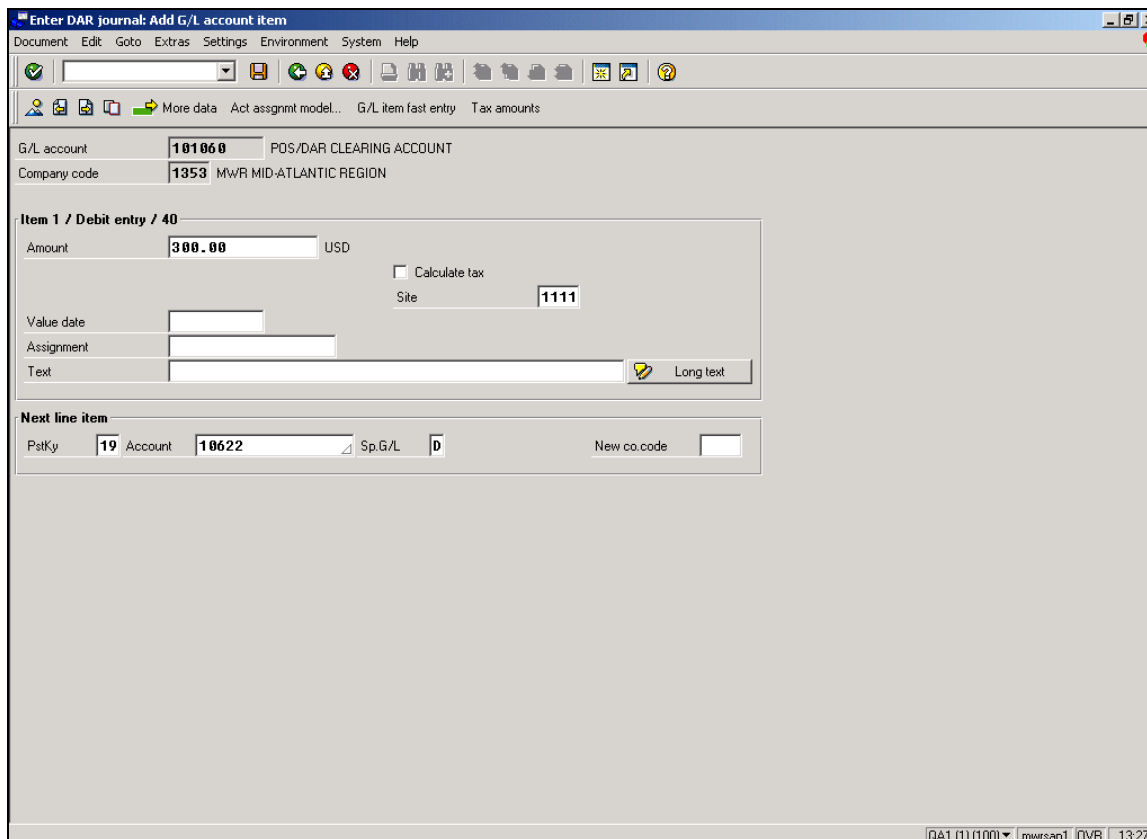

Field Name	The proper entry
Document Date	Date of the DAR
Document type	SD – DAR
Posting Date	Same as the Document date
Reference	Use standard DAR reference numbering per local MWR business office procedure
Doc. Header text	Use standard DAR document header text per

## Retail (MM)

	local MWR business office procedure
At the bottom of the window in the <b>First line item</b> section	
PstKy (Posting Key)	<b>40</b> – Debit
Account	<b>101060</b> – DAR/POS Clearing Account

Press the Enter key or click on the Green checkmark  icon.

**Second Screen:**      Enter DAR Journal: Add G/L Account Item

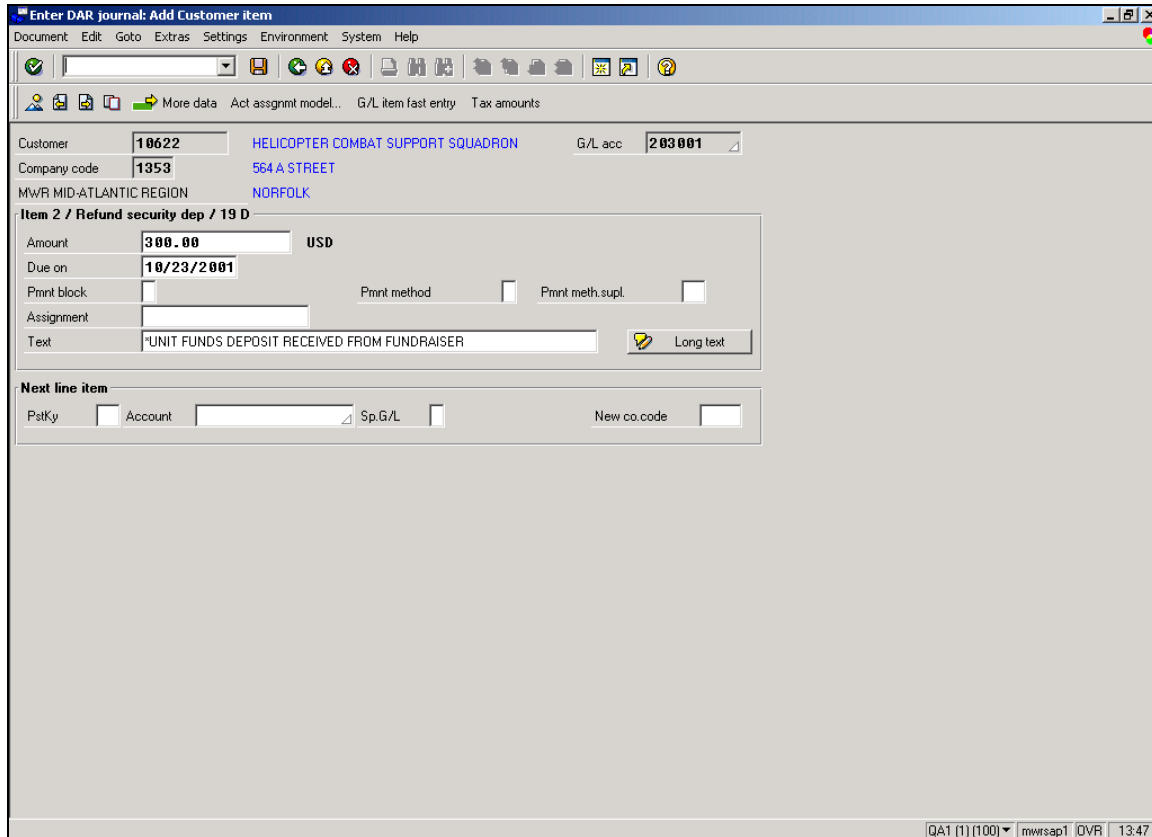

Use the following table for guidance:

The Field Name	The Proper Entry
Amount	Amount of the Deposit
Site	Enter the Site Number from the DAR
Move to the <b>Next Line Item</b> section	
PstKy (Posting Key)	<b>19</b> – Special GL Credit (for Customers)
Account	<b>Customer Account Number</b>
Sp. G/L	<b>D</b> – Deposits Payable ( <b>VERY IMPORTANT</b> )

Using the special G/L Indicator “D” with the customer account number causes the system to redirect the posting to **Deposits Payable 203001** rather than Accounts Receivable 131005.

Press the Enter key or click on the Green checkmark  icon to proceed to the detail screen for the next line item.

**Third Screen:** Enter DAR Journal: Add Customer Item

Use the following table for guidance:

The Field Name	The Proper Entry
Amount	Amount of the Deposit
Due on	Same as the Document date
Text	We recommend: <b>“*UNIT FUNDS DEPOSIT RECEIVED FROM FUNDRAISER”</b>

Press the Enter key or click on the Green checkmark  to check the entries in the current line item.

Now click on the “Document Overview” push-button  to view a summary of the DAR journal.

**Fourth Screen:** Enter DAR Journal: Display Overview

**Enter DAR journal: Display Overview**

QA1 (1) (100) mwsap1 QVR 13:50

The total deposit balance for the customer is displayed. The AR Technician can now determine whether the **Command has sufficient funds** for the amount requested. In addition, the AR Technician can determine whether this request is a **Full Withdrawal** or a **Partial Withdrawal**.

The AR Technician should indicate on the Payment Request form (or Command Request Fund Letter form, as explained above) whether the withdrawal is full or partial and whether sufficient funds exist by marked the appropriate checkboxes. The Payment Request form along with the Command's Request Letter should be forwarded to the Accounts Payable Department for payment processing.

The designated AP Technician responsible for Unit Refunds needs to know the following information in order to process the refund payment:

- **Customer Number** – required when making a payment to a customer
- **Full or Partial Payment** – used to determine payment type (automatic payment or “hot” check) (in this scenario - FULL)
- **Special G/L Indicator** – used to ensure that payments is for a deposit and is posted to the correct g/l account

The designated AP Technician **must be able to execute the payment program and print checks**.

The AP Technician receives the documentation from the AR Technician and can proceed to process the payment request. Since the Command is requesting a Full

Withdrawal of funds, the automatic payment program can be used to create the check payment.

The payment program parameters need to be adjusted to include the Command's customer number. The payment proposal, once created, will need to be edited since all customer master records are blocked for payments. The customer's payment proposal item must be unblocked manually by the AP Technician. The edited proposal can be saved and the payment run executed.

After the payment has been made, the line item display for this Command's customer account will appear as displayed below:

QA1 (1) (1001) mwsap1 OVR 13

The total deposit balance for the customer is displayed. The AR Technician can now determine whether the **Command has enough funds** for the amount requested. In addition, the AR Technician can determine whether this request is a **Full Withdrawal or a Partial Withdrawal**.

The AR Technician should indicate on the Payment Request form (or Command Request Fund Letter form, as explained above) whether the withdrawal is full or partial and whether sufficient funds exist by marked the appropriate checkboxes. The Payment Request form along with the Command's Request Letter should be forwarded to the Accounts Payable Department for payment processing.

The designated AP Technician responsible for Unit Refunds needs to know the following information in order to process the refund payment:

- **Customer Number** – required when making a payment to a customer

- **Full or Partial Payment** – used to determine payment type (automatic payment or “hot” check) (in this scenario – PARTIAL)
- **Special G/L Indicator** – used to ensure that payments is for a deposit and is posted to the correct g/l account

The designated AP Technician **must be able to create “hot” checks.**

The AP Technician receives the documentation from the AR Technician and can proceed to process the payment request. Since the Command is requesting a Partial Withdrawal of funds, only the “hot” check process can be used to make this payment. The “hot” check process allows the AP Technician to make a partial payment against an open item.

The “hot” check must be created for the Command’s customer account with processing of open items. Do not simply post a payment on account. The open item(s) (outstanding deposit(s)) will need to be selected using the residual item tab screen. The amount of the partial withdrawal should be entered as the payment against the open item(s). The “hot” check can then be posted and printed. A residual open item will be posted for the difference.

After the payment has been made, the line item display for this Command’s customer account will appear as displayed below:

As you can see from the Display Overview screen the Debits equal the Credits and the document can now be saved by clicking on the Save  icon. Of course, the 10-digit document number should be recorded on Payment request form.

After the transfer of the Unit Allocation Funds to the Command customer account, the designated AR Technician should proceed immediately to process the request for withdrawal of allocation funds. MWR policy prohibits allocating and expensing of Unit Allocations without a request by the Command to withdraw the funds for the specific purpose that they outline in the request letter.

## Scenario Five: Command Issued Request for Withdrawal of Allocation Funds

Upon receiving the Fund Request Letter from the Command requesting the withdrawal of their allocation funds, the AR Technician should **review the Customer deposit balance** to determine whether that the customer has a deposit balance that is greater than the allocation funds requests. **This situation will occur when the Command also has funds (from fundraisers) being held on their behalf. This step is very important to prevent over-refunding to the Commands.**

***											1,000.00-		

2 items were selected QA1 (1) (100) | mwsap1 | INS | 15:19

The total deposit balance for the customer is displayed. The AR Technician can now determine whether the **Command has additional “non-allocation” funds on deposit with MWR**. If there are other funds on deposit with MWR, in addition to the allocation funds then a **Partial Withdrawal** must be made. If the only funds on deposit are the unit allocation funds outlined in Scenario Four, then a **Full Withdrawal** can be made.

The AR Technician should indicate on the Payment Request form (or Command Request Fund Letter form, as explained above) whether this will be a full withdrawal or partial withdrawal of funds and that sufficient funds exist by marked the appropriate checkboxes. The AR Technician should also **record the document number of the Unit Allocation GJV so that the AP Technician can easily determine the unit allocation open item when processing a Partial Payment**.

The Payment Request form along with the Command’s Request Letter should be forwarded to the Accounts Payable Department for payment processing.

The payment type (FULL or PARTIAL) will determine the procedures that the AP Technician will follow.

FULL WITHDRAWAL – proceed with Scenario Two (replace funds from a fundraiser with unit allocation funds)

PARTIAL WITHDRAWAL – proceed with Scenario Three (replace funds from a fundraiser with unit allocation funds)

The designated AP Technician responsible for Unit Refunds needs to know the following information in order to process the refund payment:

- **Customer Number – required when making a payment to a customer**
- **Full or Partial Payment – used to determine payment type (automatic payment or “hot” check)**
- **Special G/L Indicator – used to ensure that payments is for a deposit and is posted to the correct g/l account**
- **Unit Allocation GJV Document Number**

## Scenario Six: Command Issued Request for “Payment” of Funds to MWR Activity

A Request for Withdrawal of Funds form may indicate that the Command wishes to apply its allocation funds and/or other funds on deposit with MWR to cover the cost of an event held at an MWR facility. If this occurs the designated AR Technician should review the deposit balance of the Command customer account and determine whether the MWR facility involved has submitted paperwork relating to this event.

Menu Path: Accounting > Financial Accounting > Accounts Receivable > Account > Display/Change Line Items

The total deposit balance for the customer is displayed. The AR Technician can now, by reviewing the paperwork submitted by the MWR facility involved, determine whether the **Command has sufficient funds to cover the entire cost of the event or insufficient funds and must be invoiced for the remaining cost of the event.**

### Sufficient Funds

A journal will need to be posted that will record the revenue the facility derived from the Command's event and application of the Command's funds on deposit.

Menu Path: Accounting > Financial Accounting > Accounts Receivable > Document Entry > Invoice

3 items were selected

QAT1 (2) (100) | mwsap1 | QVR | 15:51

The customer should then be cleared manually (**FOLLOW INSTRUCTIONS FROM PAGE III-116 in your SAP Manual**) and any necessary residual items created.

### Insufficient Funds

A journal will need to be posted that will record the:

- reversal of the accrual created at the time of goods receipt (event was successfully held)
- application of the Command's funds on deposit
- creation of a separate ordinary accounts receivable item for the cost of the event not covered by the available funds on deposit.

Menu Path: Accounting > Financial Accounting > Accounts Receivable > Document Entry > Invoice

Transaction Code: F-22

First screen: Enter Customer Invoice: Header Data

## Retail (MM)

Use the following table to guide you with the correct entries for the window above.

Field Name	The proper entry
Document Date	Date of the Unit Funds Request
Document type	DR – Customer Invoice
Posting Date	Same as the Document date
Reference	Use standard customer invoice reference numbering per local MWR business office procedure
Doc. Header text	Use standard customer invoice document header text per local MWR business office procedure
At the bottom of the window in the <b>First line item</b> section	
PstKy (Posting Key)	<b>50 - Credit</b>
Account	<b>Deposits Payable 203000 (account assigned on PO)</b>

Press the Enter key or click on the Green checkmark  icon. Hit “enter”

Use the following table to guide you with the correct entries for the window above.

**Second Screen:**      Enter Customer Invoice: Add G/L Account Item

Use the following table for guidance:

The Field Name	The Proper Entry
Amount	Amount of the party contract
Cost center	Cost center assigned on the purchase order
Move to the <b>Next Line Item</b> section	
PstKy (Posting Key)	<b>09</b> – Special GL Debit (for Customers)
Account	<b>Customer Account Number</b>
Sp. G/L	<b>D</b> – Deposits Payable ( <b>VERY IMPORTANT</b> )

Using the special G/L Indicator “D” with the customer account number causes the system to redirect the posting to **Deposits Payable 203001** rather than Accounts Receivable 131005.

Press the Enter key or click on the Green checkmark  icon to proceed to the detail screen for the next line item.

**Third Screen:** *Enter Customer Invoice: Add Customer Item*

## Retail (MM)
